The HDR-XR500V employs an advanced "Exmor R" CMOS sensor to capture stunning, 1920 x 1080 high definition video and 12.1 megapixel still images to its internal 120GB¹ hard disk drive. In addition, a built-in GPS receiver⁷ Geo-tags your videos and photos.

- 1920 x 1080 high definition video recording:
1920 x 1080 high definition resolution lets you record your memories in exceptional Sony® Full High Definition quality².
- 12.1 megapixel still image capture:
12.1 megapixel still image capture lets you take stunning, high resolution digital photos
- 120GB hard disk drive:
A built-in 120GB¹ hard disk drive can record and store up to 48 hours of high definition video footage (HD LP mode), or up to 84 hours of standard definition footage (SD LP mode). In addition, "HDD Smart Protection" gives you peace of mind by helping to prevent any recorded video and images from being lost if the camcorder is accidentally dropped.
- 1/2.88" "Exmor R" CMOS image sensor with ClearVid™ array:
A 1/2.88" Exmor R™ CMOS image sensor delivers bright, vivid, spectacularly detailed video footage, as well as 12.1. With 6 megapixel (effective) video resolution, the image sensor actually captures video at four times the density of high definition resolution resulting in a sharper and more detailed 1920 x 1080 HD picture. In addition, "Exmor R" technology captures images with high resolution and high sensitivity, while the advanced Sony® BIONZ™ image processor improves camera response time and screens out noise to help ensure that the signal from each pixel is as pure as possible.
- Back-illuminated "Exmor R" CMOS sensor:
Experience stunning low-light sensitivity with improved image clarity and drastically reduced grain with the newly developed, back-illuminated "Exmor R" sensor. Designed for compact cameras and camcorders, the "Exmor R" sensor relocates the photo diodes above the support circuitry, maximizing the light-gathering area per pixel so you can shoot with better results in lower lighting conditions. Approx. 2x increase in sensitivity compared to Sony's existing front-illuminated CMOS sensors at F2.0.
- Geotagging with built-in GPS receiver:
A built-in GPS receiver⁷ makes the HDR-XR500V an ideal choice for travelers. In addition to automatically adjusting your camcorder's clock to the proper time zone, the GPS receiver also gives you the ability to view your current location on the LCD map display, as well as "tag" your shooting locations. Tagged videos and still images can be reviewed and played back using the Map Index function on the camcorder or once downloaded to your PC using the supplied PMB (Picture Motion Browser) software⁹.
- Map Index function:
Map Index uses the geotagging capabilities of the built-in GPS receiver⁷ to "tag" your shot locations on a map in the camcorder, offering a new way to easily search and find a desired scene by location or view where a scene was captured.
- 3.2" wide touch panel Xtra Fine LCD™ display³ (921K pixels):
- Power On by opening LCD display:
- Highlight Playback:
- Professional-quality Sony® G Lens:
- 12X Optical / 150X Digital Zoom:
- Dedicated Mic and Headphone inputs:
- Dolby® Digital 5.1ch recording with Built-in Zoom Mic:
- Active Interface Shoe:
- Dual Record with 8.3MP still image capture:
