Switchcraft® is proud to introduce the latest additions to the StudioPatch® Series family... five Audio Pass-Through Panels designed to meet all of your input/output needs.

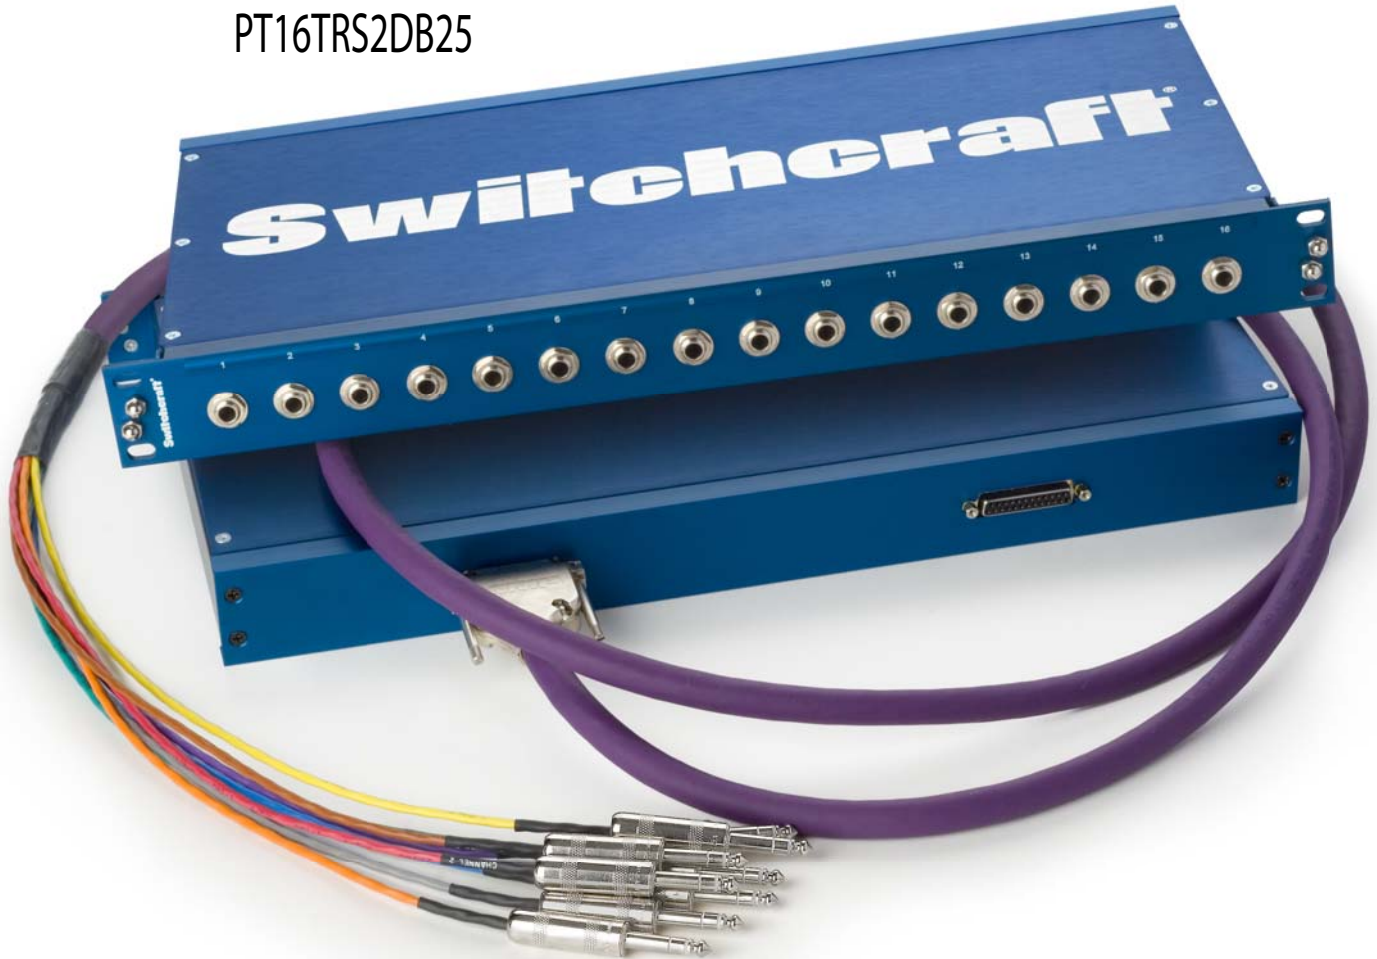

Everything from the anodized extruded aluminum panels, to the hard-wired 110 Ohm AES/EBU digital audio cable, to our world-class XLR connectors and TRS Jacks have been precision engineered for long-lasting quality, durability, and dependability.

All versions terminate to two DB25 connectors wired to the TASCAM DTRS standard pinout. They are perfect for anyone requiring easy access to their I/O's in any permanent or mobile studio/broadcast environment.
