PLC-XU355

XGA Ultraportable Multimedia Projector

A SIMPLE WIRELESS SETTING FOR USE WITH A USB MEMORY
The PLC-XU355 has an innovative wireless feature called "Simple Wireless Set Up". This model can set up a wireless connection easily without installing a software from a CD-ROM. Just pass off the USB memory. By connecting the PC and USB memory, the program in the PLC-XU355 starts running automatically, and the image will be projected directly on the screen.

NETWORKING CAPABILITY
Bright 3500lm, the PLC-XU355 is equipped with SANYO's exclusive PJ-Net Master Network Interface software for wired and wireless networking, a common feature among SANYO's extensive line of commercial projectors. Networking allows the monitoring of projector functions and operation from a long distance via a web browser for up 15,000 Sanyo projectors. Emails can be sent automatically to report operating status.

COMPLETE EASY AUTO SET UP FUNCTION, SMART AUTO INPUT SEARCH AND AUTO VERTICAL KEYSTONE CORRECTION
PLC-XU355 provides "Auto Set Up Function" that corrects keystone shaped distortion by searching for an input signal and detecting projector incline, therefore reducing set up time. PLC-XU355 automatically compensates for keystone picture distortion. Auto Keystone Correction, Auto Input Search and Auto PC Adjustment make it a really smart projector.

SHORT THROW LENS WITH 1.6 ZOOM AND 7W SPEAKER
PLC-XU355 is equipped with a zoom lens that allows screen size adjustment. The optical zoom works to maintain the image quality. The short-focus type lens allows large screen image projections with a short throw distance. The PLC-XU355 enables 100-inch screen projection at the shortest distance, 80 inches. Along with its mobility, the PLC-XU355 features a high-output 7 Watt speaker. Sufficient audio is delivered through its built-in speaker, so the projector can be used in conference rooms, classrooms, and other similar spaces.

BLACK BOARD / COLOR BOARD MODE
What could be more right for education? A black board mode. The PLC-XU355 is compatible with four colored (red, blue, green and yellow) projection surfaces via the 'Color Board Mode'. It adjusts the color to make images look as true as on an ordinary white screen.

LAMP REPLACEMENT ON TOP CABINET
There is access to the lamp from the top of the projector which means you can replace the lamp on a ceiling-mounted unit without taking down the projector.
