

ANY SPOT[®]

ANY SPOT HEADSET MICS

**AS-HSS, AS-HSH,
AS-HSD, AS-HSA**

Galaxy Audio offers a complete line of Headset Mics that are compatible with all of the Any Spot Wireless Mic Systems as well as systems from many other companies. They are available with either Omni-directional or Uni-directional elements. The Omni types offer the widest frequency response, while the Uni types are useful in live PA situations to help control feedback. Each mic incorporates one of the following lightweight attachment systems: Single Ear Loop (HSS), Wraparound (HSH), or Dual Ear Hook (HSD). Each of these three types may also be special ordered with one of several optional connector types installed to allow compatibility with transmitters made by other companies. We also offer two new HSA models which feature a Single Ear Loop, Omni element, and come with your choice of one of the following screw-on connector adapters: Galaxy/AKG, AT, Sennheiser, or Shure. All of these adapters are available separately so you may add new ones at any time. Mics and attachment systems are available in Black (BK) and Beige (BG) colors. The small, unobtrusive design of Any Spot Headset Mics allow them to blend in and give the appearance that the performer is not even wearing a mic. And for those situations where a wireless system is not required, all of the standard Galaxy Audio Headset Mics are compatible with the optional Phantom Body Pack (JIB/PB). The JIB/PB supplies the mic with the correct operating voltage and features an XLR output jack for patching into a mixer using a standard mic cable.
