DESCRIPTION

The MVP12M is a high output, super-compact, two-way stage monitor system. The system utilizes one HF20 proprietary high-frequency compression driver coupled to an exponential horn and one 12" woofer for high sensitivity and excellent power handling capability. These components are matched to an extremely low-profile enclosure of an optimally tuned, direct radiating, bass reflex design. The recessed handles, black carpet exterior, perforated steel grille, and injection molded corners make this system attractive, rugged and easily transportable.

The MVP12M offers a robust internal crossover with Dyna-Tech Dynamic HF Driver Protection. The crossover is built to last with high quality inductors, precision wound coils and military grade circuit boards. The proprietary Dyna-Tech Dynamic HF Driver Protection circuit provides both over-current and thermal protection for added performance and reliability

Designed as a high performance stage monitor, the MVP12M offers the clarity and detail necessary for critical live performance use. In addition, its smooth, peak-free response provides maximum gain before feedback ensuring capability for high on-stage sound pressure levels. The compact, low-profile design makes the MVP12M ideal for TV broadcast, house of worship and other applications where stage equipment must be as unobtrusive as possible, yet provide fully professional performance.
