Motionflow™ 120Hz technology Engineered for fast-action sports, movies and games, Motionflow 120Hz technology reduces blurriness and judder. Overall, motion is smoother, sharper, and more natural when watching your favorite HD content, DVDs, and even broadcast movies and prime-time programming.

Use your in-home broadband connection and the BRAVIA HDTV remote control to access online video, music, and more content from over 20 providers including Amazon Video On Demand, YouTube™, Sports Illustrated, Sony Pictures, Sony Music, Slacker and Epicurious.com.

BRAVIA® Internet Widgets Personalize your viewing experience by selecting, positioning, and resizing widgets on your BRAVIA HDTV display. BRAVIA Internet Widgets are small applications that can be accessed with the touch of one button providing you with the latest in news, weather, stock info, and much more right on your BRAVIA W-Series HDTV.

BRAVIA Engine™ 3 fully digital video processor BRAVIA Engine 3 is the newest fully digital video processor from Sony®. It uses a collection of enhanced algorithms to significantly reduce noise, enhance overall image detail, and optimize contrast so every scene produces sharp, vibrant, life-like images.

USB with photos, music, and video Connect your compatible camera, USB-enabled MP3 player, or USB storage device directly to the HDTV's USB input to view photos on the big screen or listen to your favorite MP3s. BRAVIA® W-series HDTVs also include mpeg2 video file support, so you can go straight from shooting video to screening it via USB.

DLNA® with photos, music, and video Compliance with DLNA (Digital Living Network Alliance) allows BRAVIA® W-series HDTVs to access digital photos, music, and video from DLNA-enabled PCs and other devices, so you can enjoy your memories with family and friends in the comfort of your living room instead of crowding around a PC.
