

SATA II ExpressCard 34

2 eSATA Ports For Fast SATA II Performance

Quick & Easy Upgrade

The LaCie SATA II ExpressCard 34 enables you to affordably upgrade your PC or Mac® laptop to fast SATA II connectivity, which boasts an extremely rapid interface transfer rate of up to 3Gbits/s. This card provides two ports so you can connect two external SATA devices simultaneously. Installation is swift and simple. It supports eSATA hardware hot plugging/unplugging and external hard drives with the Native Command Queuing (NCQ) feature.

The High Performance Interface

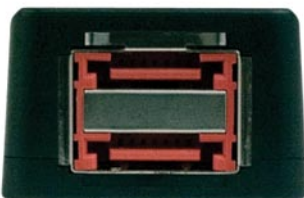

Serial ATA does not have to share the bus, instead dedicating full bandwidth to the device. SATA works best in storage environments that require high data throughput to deliver large files quickly and efficiently, maximizing utilization and enhancing productivity. Due to its performance, reliability, scalability and cost-effectiveness, SATA can optimize a wide-range of solutions, from desktop to network storage.

Multiple Connections

Perfect for connecting your laptop to your LaCie Biggest Quadra, Two Big, 2big Dual, d2 Quadra or d2 eSATA II 3Gbits Hard Drive, this card is also compatible with port multiplier devices like the LaCie Biggest S2S and with non-LaCie eSATA devices. In addition, it's backward compliant with SATA I (at SATA I performance).

Broad Compatibility

Whether you use a PC or Mac computer, the LaCie SATA II ExpressCard 34 brings the impressive speed of this advanced interface to your system. It's compatible with computers running on Windows® 2000, Windows XP, Windows Vista™ or Mac OS X 10.4.7 or higher or a Linux based system.

- Add 2 eSATA ports to your PC/Mac laptop
- Connect to 2 external SATA devices simultaneously
- Upgrade to SATA II performance affordably
- Connect to port multiplier devices like Biggest S2S

Features

- Fast interface transfer rate: up to 3Gbits/s
- Plug & play
