HDR-CX110

High Definition **Flash Memory** Handycam® Camcorder

Capture stunning 1920 x 1080 Full HD video² and 3.1 Megapixel images with the ultra-compact HDR-CX110, which features an "Exmor R" CMOS sensor for superior low-light performance and a Carl Zeiss® Vario-Tessar® 25x optical zoom lens to help bring you closer to the action.

Full HD Recording with 60p playback

Record amazing HD video at full 1920x1080 resolution and enjoy 60p playback via HDMI™ cable and compatible HDTV. Additionally, you can record your video at 24 Mbps, the highest possible bit-rate for AVCHD, and enjoy near Blu-ray Disc™ quality video reproduction.²

1/4" "Exmor R" CMOS Sensor

Delivers bright, vivid, spectacularly detailed video footage, as well as 3 Megapixel still images. Additionally, it provides stunning low-light sensitivity with improved image clarity and drastically reduced grain whether you're in video or still photo mode.

Carl Zeiss® Vario-Tessar® lens

Features precision-ground optics to help achieve the level of sharpness and contrast usually found only in larger lenses, plus SteadyShot® image stabilization with Active Mode to help reduce blur caused by camera shake.

Face Detection Technology w/ Face Priority

With Face Priority, your camcorder optimizes focus, color, exposure, and Smile Shutter™ technology for the face you prioritize. Just touch the preferred face on the LCD display and the camcorder will not only prioritize it for you, but will remember your prioritized face until the camera is turned off.

Quick Autofocus

An improved autofocus (AF) system now lets you take crisp images even faster. In fact, this new Quick AF feature focuses twice as fast when compared to previous Sony camcorder models.

Direct Copy to External HDD

Lets you copy videos from your camcorder directly to an external hard disk drive (sold separately)[13], all without a computer. Your camcorder can also access videos stored on the external hard drive for playback on your HDTV[4], allowing you to utilize the camcorder's handy playback features.

Highlight Playback with Highlight Scenario playback

Automatically creates short movies—complete with music and transitions—by identifying and compiling key scenes. You can then save up to eight of these movies for later playback.

Intelligent Auto Mode

Analyzes your shot and then automatically selects the appropriate settings from 9 distinct scene modes: Landscape, Backlight, Twilight, Spotlight, Low light, Macro, Portrait, Baby, Tripod. Lets you get extra creative with 60 possible scene combinations.

2.7" Clear Photo™ LCD (230 K) display[3]

Provides excellent viewing clarity with improved resolution (230K pixels). The display rotates up to 270 degrees for multiple viewing angles, as well as provides sharp, detailed images for monitoring or playback. The convenient touch panel allows easy access to menus and additional functionality such as spot focus and spot metering.

Up to 24Mbps AVCHD video²

Lets you capture video at up to 24Mbps for amazing clarity and detail, ideal for recording onto Blu-ray Disc™ media.

Additional Features:

• Power On by LCD

• Sony® PMB (Picture Motion Browser) software[9]
