

# APC20

## ABLETON PERFORMANCE CONTROLLER

**EVERYTHING YOU NEED. NOTHING YOU DON'T.** The second model in the APC series, the APC20 offers a smaller footprint than the APC40, enabling musicians to more easily create a personalized setup with multiple APCs, effects controllers, and other devices. Designed in partnership with Ableton, the APC20 is the ideal controller for Live users looking for maximum portability, or APC40 owners looking to expand their existing Live setup. With the same clip-launch grid and high-quality faders found on the award-winning APC40, the APC20 is sure to please even the most space- and budget-conscious Live user. If you're looking for the perfect controller for Ableton Live, don't settle for anything less than an APC.

## FEATURES

- Designed in partnership with Ableton, mapped for Live, and fully customizable
- Clip Launch matrix with multicolor lighting displays current clip status
- No mapping required; every button and fader is pre-mapped
- Bidirectional hardware/software communication for visual feedback on APC20
- Solid, professional feel with rugged, metal chassis and premium controls
- Comes with Ableton Live Akai Professional APC Edition software
- Works with standalone editions of Ableton Live
- USB plug-and-play connection for Mac and PC
