

The finest sound around, from Yamaha, the name to trust in hi-fi.

Compact Disc Player
CD-S300RK

1-disc type
Compact Disc Digital Audio
USB
Made for iPod

Compact Disc Changer
CD-C600RK

5-disc type
PLAY-CHANGE™
Compact Disc Digital Audio
USB
Made for iPod

High Sound Quality

- Pure Direct
- Extremely sophisticated circuitry and layout
- Short signal paths
- High performance DAC for high conversion precision with low noise
- Laser pickup floating mechanism
- Intelligent Digital Servo

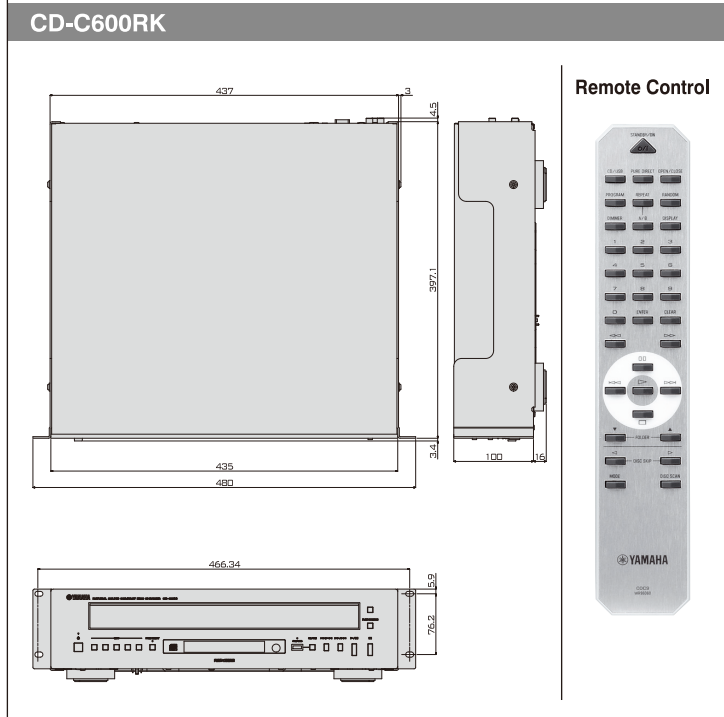

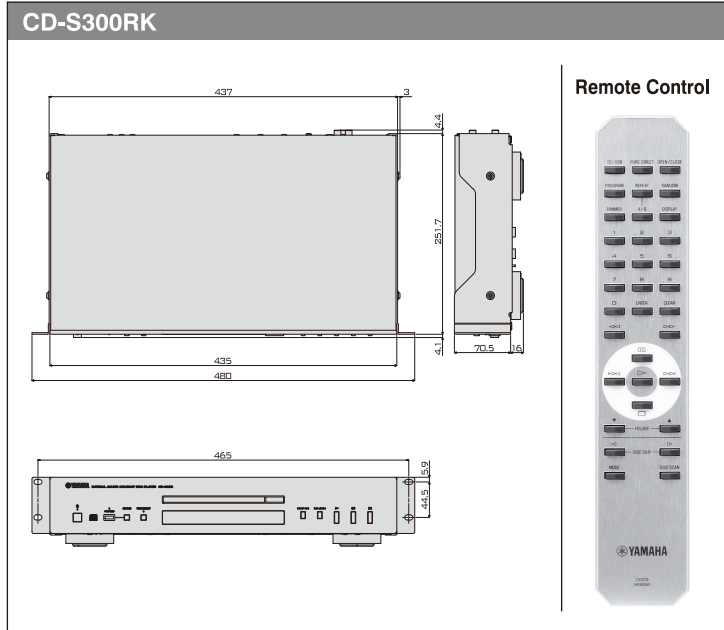

Advanced Features

- USB port on front panel for iPod and other devices
- iPod compatibility
- CD-R/RW disc playback compatibility
- MP3 and WMA compatibility
- Numerous convenient playback functions
- RS-232C interface and IR in/out for installation (CD-C600RK only)

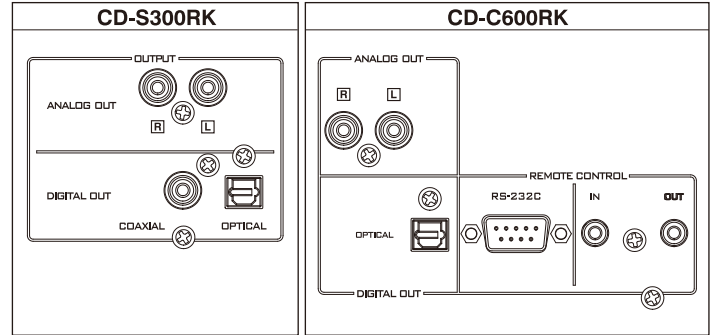

■ Main Specifications

Model	CD-S300RK	CD-C600RK
Frequency Response (± 0.5 dB)	2 Hz - 20 kHz	2 Hz - 20 kHz
Harmonic Distortion + Noise	≤ 0.003 %	≤ 0.003 %
Signal-to-Noise Ratio	≥ 105 dB	≥ 105 dB
Dynamic Range	≥ 96 dB	≥ 96 dB
Output Level (1 kHz, 0 dB)	2 ± 0.3 V	2 ± 0.3 V
Dimensions (W × H × D)	435 × 86 × 260 mm (17-1/8" × 3-3/8" × 10-1/4")	435 × 116 × 405 mm (17-1/8" × 4-5/8" × 16")
Weight	3.5 kg (7.7 lbs.)	6.2 kg (13.7 lbs.)

■ Dimensions (unit; mm)

■ Connectors (Rear Panel)

Pure Direct

The CD-S300RK and CD-C600RK offer the same Pure Direct feature popular in Yamaha amplifiers and receivers. Pure Direct is a special listening mode which ensures the highest quality analog audio output. Pure Direct shuts down the digital audio output with the press of a button on the front panel or the remote control, and turns off the display, thus achieving the lowest possible noise interference.

USB port on front panel for iPod and other devices

The USB port facilitates high quality sound playback from MP3 or WMA digital music files stored on USB players and memory devices, on memory cards connected to USB card readers, and, of course, on CD-R/RW discs.

An iPod, too, connects to the USB port via USB cable for instant playback through an audio system. The digital signal is generated by the CD player with no degradation or jitter, converted to analog by the high performance DAC, and transmitted to the amplifier via high quality audio circuitry, for the ultimate in music playback fidelity. Play, pause, skip and forward/backward using the remote control. Song, artist and album names are displayed. Compatible with the iPod classic (including the 120GB classic), iPod nano (2nd, 3rd, 4th generation) and iPod touch (1st and 2nd generation). Charges the iPod automatically when the power is on and USB mode selected.

PlayXchange (CD-C600RK only)

With the PlayXchange, change CDs while the current one is playing. Changing discs does not interrupt the music and more than one disc can be changed at a time.

PLAYXCHANGE™
