Use the Sample Recorder to record your own custom samples and drag them straight from the Recorder into Beatstation.

02 BEATSTATION DRUM PADS

The Beatstation drum pads hold all of your drum sound. Mix and match sounds to build your own sound sets.

03 PAD PROPERTIES

Each pad in Beatstation has its pad properties surface. Here you can design the sound of the pad from top to bottom, start to finish.

06 BEATSTATION CONTROLS

The basic controls lets you access cool effect presets as well as your basic player controls.

07 BEATSTATION MELODIC PADS

The melodic pads play bass and lead instruments. Stack, design and tweak bass and lead sounds to create your own sound.

GET STARTED

01 CREATE TOONTRACK ACCOUNT

Click the 'Create account' button.
Fill in your details. Click the 'create' button.
Don´t forget to verify your account by following the instructions in the verification e-mail you will receive.

02 REGISTER AND AUTHORIZE

Enter your Beatstation serial number (found on the back of the core content card) into the box on the screen. Add a description of the computer that you are installing Beatstation on.

03 OFFLINE AUTHORIZATION

If your computer is not connected to Internet, click the 'Offline' button and follow the instructions

## 04 START PLAYING BEATSTATION

Go ahead. Start making music.
Change your pads to fit your needs.
Beatstation lets you design the look of the playing surface to make it truly yours.

it's what you want it to be

Beatstation lets you design the look of the playing surface to make it truly yours.
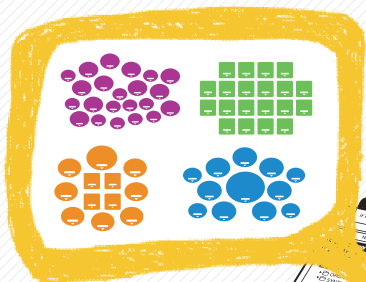

Design your pad layout

SHAPE YOUR PADS

The playing pads of Beatstation can be moved freely in the interface. They can be square or round and be laid out any way you want them to. You can change the color code of each pad. When you have the pad surface you want, save it as your own custom set-up.

DRUMS

The drum pads in Beatstation hold all of Beatstations drum sounds. From classic acoustic and electronic drums, through REX file elements to your own samples.

BASS

BASS

The Bass pad in Beatstation holds your Bass instrument. Either use the Bass libraries that come with Beatstation or make your own sound.

LEAD

LEAD

The Lead pad in Beatstation holds your Lead instrument. Either use the Lead libraries that come with Beatstation or make your own sound.

REX

Beatstation plays any REX file. Either use a single element of a file to shape your sound or trigger the entire REX groove from a Beatstation pad.

REX

MIDI

Beatstation features MIDI grooves containing drums, bass and lead instruments that will give you a plug and play, drag and drop starting point for your next beat.

MIDI

PLAY/PAUSE BUTTON

Play your MIDI on its own or together with a REX groove.

VELOCITY

velocity

Change the dynamics of your MIDI using the velocity sweep.

SWING

swing

Change the swing of your MIDI by using the swing control.

FLAM

flam

Make your drum track real using the flam control.

BEATSTATION DESIGN

You can change the color of your Beatstation.

At Beatstation.com you can find cool alternative skins for Beatstation.

Design your own Beatstation skin and share it with others.
