3632 Compressor

DUAL CHANNEL COMPRESSOR / LIMITER / GATE

INTELLIGENT COMPRESSION AND DYNAMICS. The Alesis 3630 Compressor™ is the most popular dynamics processor ever made. Its successor, the 3632 Compressor, builds on its popular design and features. This easy-to-use unit provides two independent full-featured compressor/limiters in one compact rack space with excellent sonic quality for any application from studio recording to live sound or broadcast.

The 3632's compressor attack and release times can be automatically set dependent on the source material, or full manual control can be exercised. The unit can function as either two separate processors, or stereo linked to provide true stereo compression. An adjustable expander/gate and very low distortion Voltage Control Amplifiers (VCA) deliver smooth sound.

FEATURES

- Stereo compressor/expander/limiter/gate
- Minimized signal path for optimal sound quality
- Intelligent Knee for musical performance with soft and hard-knee envelopes
- Intelligent Ratio adjusts expansion based on input signal
- Intelligent Gain auto-adjusts output
- Auto attack and release times based on signal analysis, plus full manual control
