

# NanoVerb 2

## DIGITAL EFFECTS PROCESSOR

**COLOR YOUR SOUND WITH 256 RICH ALESIS DSP PROGRAMS.** The NanoVerb™ 2 gives you 256 killer effects algorithms in a compact, easy-to-use, and incredibly affordable package. You'll enjoy its lush hall, plate and room reverbs, rich and true stereo chorus, flange, delay, and rotary speaker emulation. Plus, the NanoVerb 2's 52-bit DSP resolution ensures sonic quality that allows you to use it for any effects application from guitar rigs to studio recording.

The NanoVerb 2's front panel adjust knob allows you to tweak the NanoVerb 2's great-sounding programs until they're just right for your music, while the Input/Output levels and Mix controls ensure proper effect levels for a wide variety of applications. Plus, with its amazing low cost, you can afford to put two or three NanoVerb 2s in your rack for dedicating to multiple sources.

## FEATURES
