

REAR PROJECTION

Custom Digital Displays as big as your imagination.

With the introduction of Da-Lite's new Holo Screen, you can let your imagination soar. Retail and commercial digital displays don't have to be limited to the size of available flat screens.

With Da-Lite two piece projector and Holo Screen combinations, what you can imagine, we can produce. The all new Holo Screen is available up to 108 x 300 inch rear screen projection sizes. Perfect for increased impact on specialty retail, office lobbies, airports and other high traffic commercial and retail locations.

The Holo Screen features a completely new rear screen that utilizes a proprietary optical coating for crisper images that result in improved impact in installations. Designed for use with virtually any projector, the new Holo Screen allows architects, AV consultants and integrators to specify custom sizes without the high cost associated with custom installations.

The innovative new Holo Screen features a projection angle from 18 to 35 degrees and a generous viewing angle. The net result is a remarkably bright and clear image, even in brightly lit environments. All other light – such as sunlight and other sources of ambient light – is ignored making Holo Screen ideal, even for retail shop windows. The transparency of the new Holo Screen allows an image to be projected while letting the viewer see through the screen at the same time.

Affordable and fantastic, let Da-Lite's new Holo Screen take your next digital display to new heights.
