

# INFRARED WIRELESS MICROPHONE SYSTEM

Introducing an infrared wireless microphone system that meets the need for secure and interference-free communication

## Offering secure and interference-free commun

TOA's latest Infrared Wireless Microphone System incorporates a range of conference and communication enhancing features that will appeal to users who want confidentiality as well as interference-free communication. Because the microphones use infrared signals, sensitive matters being discussed in a meeting room won't leave the room, and the wireless microphones can be used in several adjacent classrooms simultaneously without interference. In this way, this infrared microphone system can meet communication needs in educational and business environments perfectly.

The TOA Wireless Microphone System is ideal for use in schools. If the microphone is set for the same channel, there is no need for teachers to change to another one when moving to a different room. This IR system ensures that the teacher's voice reaches all the students in the classroom, and helps the students to better understand what's being taught. Consequently, a stress-free classroom and learning environment for both teachers and students is created.

The microphones are also an excellent solution for secure, efficient and smooth conducting of meetings, free from concern about confidentiality, or about being disturbed by interference from outside. They can even be used in a room where a TOA TS-800/900 Series Infrared Wireless Conference System is also in operation, offering an added convenience.

### IR-200M

### Infrared Wireless Microphone (Hand-held)

#### Designed for stable voice transmission, thanks to two infrared emitters carefully located on a microphone body shape that helps prevent the emitters from being accidentally covered by a hand when holding the microphone.

- Lightweight body keeps hands from tiring even during long hours of use (0.4 lbs with 2 alkaline batteries).
- Infrared light emission intensity is adjustable at 2 levels.
- •T wo selectable channel frequencies.
- · Antibacterial treatment.
- · Employs an electret condenser microphone unit.
- · Low-battery indicator.
- Color stickers supplied to distinguish one unit from other wireless microphones.

#### **IR-200BC Battery Charger**

- · Capable of charging up to 2 microphones (both hand-held and hands-free types) at a time.
- W ith rapid charging feature, up to 2 infrared microphones can be simultaneously charged in 3 hours (maximum).
- Charge status indicator (charging, charge complete).

Infrared Wireless Tuner

· Comes with a built-in 2-channel fixed-frequency tuner.

•T wo line outputs, one with a MIX output switch allowing output of mixed voices from channels A and B.

• Rack-mountable with optional brackets (MB-WT3/MB-WT4)

Infrared Wireless Distributor

· Equipped with signal reception light and knob for

microphone volume control.

· Enables installation of up to 4 infrared light receivers per unit

#### IR-500R Wall-Mount Receiver

- · Supplied wall-mounting brackets facilitate installation.
- · Can be installed in an electric circuit box.
- · Equipped with power indicator LED.
- Reception area is up to approx. 49' line of sight.\*
- Infrared light reception angle can be changed.

#### IR-510R **Ceiling-Mount Receiver**

- · Supplied ceiling-mounting brackets facilitate installation.
- Equipped with power indicator LED.
- ·lt covers a practical radius of approx. 26'\*

#### IR-520R Wall-Mount Receiver

- · Can be mounted on a wall and on a microphone stand. Supplied stand-mounting brackets facilitate installation.
- · Equipped with power indicator LED.
- Reception area is up to approx. 49' line of sight.\*

YW-1022/1024, the system with up to 16 infrared receivers can be configurable. Rack-mountable with optional
