

TransActive MX

PORTABLE, FOUR-CHANNEL PA SYSTEM FOR iPod

MIX, AMPLIFY, AND PLAY BACK, ALL IN ONE BOX

Remember when playing a simple show and setting up the PA meant moving racks and racks of gear, lugging hundreds of pounds of speakers, and running miles of cables? Those days are over, thanks to the Alesis TransActive MX. This all-in-one, four-channel PA speaker gives you everything you need to play the show, play transition music from your iPod or iPhone, and load in and out in comfort.

ALL IN ONE

The TransActive MX is a complete, active PA system in a single, portable cabinet you can carry with its built-in handles or roll using the recessed wheels and pull-out handle. The system has a four-channel mixer built in with XLR and 1/4-inch inputs for microphones, all kinds of instruments, guitars, and more. Plus, the TransActive MX has a dock for all docking models of iPod and iPhone, playing music, and charging. This self-powered speaker has a built-in amplifier and a two-way loudspeaker for full-range sound. And it runs for hours and hours on its internal, rechargeable battery.

INPUTS

The TransActive MX's input section enables you to connect four channels of microphones, instruments, guitars, and other sound sources. It has XLR, 1/4-inch, and RCA inputs for a variety of gear.

AMPLIFIER AND SPEAKER SYSTEM

The TransActive MX uses a built-in amplifier for low distortion and high efficiency. The large driver gives you great low end and powerful, crisp highs.

BATTERY OR WALL POWERED

The TransActive MX has a built-in rechargeable battery for hours of cordless amplification. You can also plug in for unlimited performance time.

Rock the club with the TransActive MX. You'll spend less time and energy carrying and setting up, and more time enjoying the gig.
