DM10X Kit

PREMIUM SIX-PIECE PROFESSIONAL ELECTRONIC DRUMSET

THE SOUND SYSTEM DESIGNED FOR TODAY'S DRUMMER

The DM10 X Kit is a premium, six-piece, professional electronic drum set that delivers serious 10, and 12" drum pads, 12, 14, and 16" cymbals, our top-of-the-line DM10 module, and the best-in-class chrome-plated Xrack that's loaded with professional hardware features including a fully-adjustable snare stand. With more than 1,000 sounds featuring Dynamic Articulation™ multi-sample technology, an advanced sequencer and metronome, tons of play-along tracks, and a sleek new look, the DM10 X Kit will seriously blow you away.

With the DM10 X Kit we've included a comprehensive set of large drum and cymbal pads, and an all-new Xrack. The DM10 X Kit is designed to offer capabilities and features previously only available on kits costing thousands more. The DM10 X Kit's all-new Xrack is rugged, chrome-plated and features an ultra-solid four-post design. New Alesis quick-release clamps secure each pad in place and allow you to rearrange your setup in seconds without tools and without having to the rack apart. The DM10 X Kit's snare pad comes with a separate, fully adjustable snare stand that allows you to place the snare pad precisely where you want it.

Put simply, the DM10 X Kit has the most generous drum and cymbal pad configuration we've ever offered. Find an Alesis dealer near you to try it out for yourself.

FEATURES

> Six-piece configuration with 10/10/12/12" toms and 12" snare
