Introducing the HD Video Messenger VM4

The First Affordable HD Character Generator!

The Video Messenger VM-4 is an affordable and easy to use HD messaging system designed for the non-broadcast market. This leading edge solution enables you to transform your digital television systems into powerful multimedia communication displays. Text messages, crawls, images, and more can simply be created and scheduled to play in one or multiple locations. Its solid-state platform is designed to reliably deliver your multimedia messages and is easy to remotely manage and expand for growth. From basic crawls over external SD or HD video, to full multimedia presentations in multiple locations, the VM-4 enables you to provide professional multimedia results at a breakthrough price.
