

## pArtScience™ AudioTiles™

Looking for aesthetic alternatives to acoustical absorption treatments? **pArtScience AudioTiles ShockWave** delivers maximum broadband absorption for a pleasing, well-controlled sound without being perceived as too dry. Unlike traditional products, the patent-pending **AudioTile** offers unlimited design possibilities for one-of-a-kind personalization and a custom-designed look.

## pArtScience™ SpaceArrays™

**pArtScience SpaceArrays** evenly and randomly disperse sound waves to provide a consistent acoustical environment in any room. Unlike other high-end diffusers, the **SpaceArray** employs a quasi-random array using state-of-the-art engineering techniques and carefully selected, high-quality materials for superior sound diffusion.

## Elite-CFS™ Custom Fabric System

The **Elite-CFS Custom Fabric System** is Auralex's proprietary, fully-engineered acoustical treatment system. Utilizing a patented retention channel and custom installation process, an **Elite-CFS** installation will turn any room into a completely immersive and dynamic listening environment.

Whether you have a custom home theater, conference room, professional audio facility, house of worship, or any dedicated listening environment, the **Elite-CFS** will provide the highest level of acoustical control. By enabling the designer to dictate the finished look of the system, any aesthetic desire can be realized.

Additional custom options of the system include a fiber-optic starfield, motorized theater drapes, high-end **pArtScience SpaceArray** diffusers, and sound isolation materials.

acoustics

As home theater audio and video technology continues to evolve, sound control solutions must continue to meet greater acoustical demands while concurrently maintaining aesthetic appeal.

The Auralex® SonoSuede HT™ is a cost-effective and complete do-it-yourself room treatment system ideal for home theater applications. The synthetic suede fabric panels provide the acoustical performance and visual allure that are critical in today's home theaters.

The SonoSuede HT System's distinctive design offers a multitude of decorative options.

Available in three standard color combinations [Black/Red; Black/Tan; Brown/Tan]. Custom colors available by special order.

The SonoSuede HT System consists of four, 2" thick back-beveled panels predominantly used in the corners of a room to control low frequency anomalies, and eight 1" thick trapezoidal square-edged panels used for taming reflected sound, providing a total of 54 ft<sup>2</sup> of coverage.

The SonoSuede HT System's unique mounting blocks provide additional acoustical benefits by allowing the customer to easily space the panels from the wall.
