SonoSuede Pro™ System

As Pro Audio technology continues to evolve, sound control solutions must meet greater acoustical demands while maintaining aesthetic appeal.

The **Auralex® SonoSuede Pro™** is a cost-effective complete do-it-yourself room treatment system ideal for the professional studio. The synthetic suede fabric-covered panels provide the acoustical performance and visual impact critical for today's applications.

The **SonoSuede Pro System's** unique mounting blocks help you get the most out of your treatment by spacing the panels off the wall. The resulting air gap dramatically improves low frequency absorption and also offers a multitude of decorative options.

SonoSuede Pro
