SHURE® WIRELESS CHOIR STICK MICROPHONE SPEC SHEET

CSM-41W and CSM-61W WIRELESS CHOIR STICK MICROPHONES

The CSM-61W and CSM-41W series WIRELESS Choir Stick Microphone (CSM) offers the ability to use wireless technology for a totally portable choir configuration. The WIRELESS CSM provides the performance of an overhead hanging choir microphone by placing the microphone element above and over any choir application. Constructed of a black, space-age aluminum alloy, and fitted with over 2" of Micro-Flex gooseneck articulation, both the 40" and 60" models are able to adjust to an exact placement requirement.

The WIRELESS CSM will plug directly into your SHURE® wireless transmitter allowing the portable Choir Stick Microphone to transmit through your SHURE® Wireless system. The provided W-Clip will secure your transmitter to your microphone stand, maintaining a low profile and neat appearance. This versatile choir microphone can be used in both WIRELESS and WIRED applications, expanding performance options dramatically. Internal re-wiring at ACE allows the CSM to work directly with your SHURE® wireless transmitter or the wired power supply.

The WIRELESS CSM mounts on any standard microphone stand with any taper body mic stand clip. ACE has developed our own Taper Body Clutch that allows the WIRELESS CSM to extend as needed for your specific application and will not become unbalanced or tip over even when fully extended (as shown to the right). Use the WIRELESS CSM for adult or children's groups on the stage steps, portable risers, or anywhere.

Featuring SHURE's® miniature electret elements, with two pick-up pattern choices, the WIRELESS CSM allows you to choose a tight pattern to improve isolation from other stage noise, or a wide pattern for use in theater or other production applications.

Each WIRELESS CSM is supplied with everything necessary for use with your WIRELESS or WIRED application. Choose one of two interchangeable electret elements, a W-Clip for securing your SHURE® wireless transmitter to your stand, a Taper Body Clutch, a Taper Body Stand Clip, and a SHURE® Power Module with UU-Clip (for use in wired applications).

SHURE®
