

# Vaddio™ Portable Video Whiteboard Stand

Stand Part Numbers: 998-5446-600 and 998-5448-800

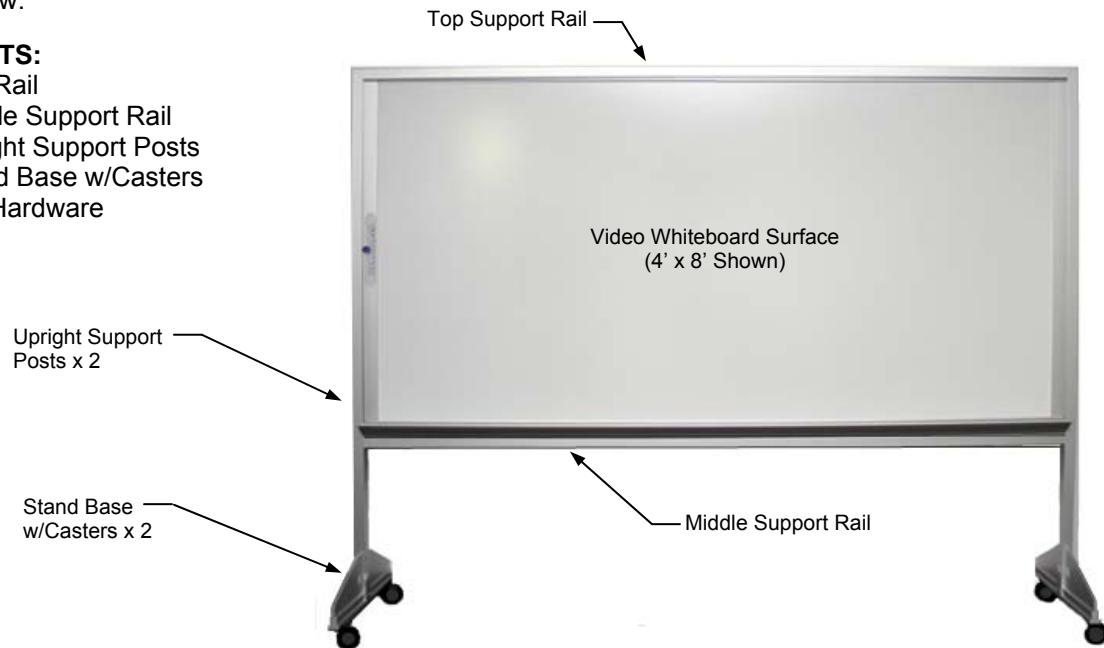

## OVERVIEW:

The Video Whiteboard Stand is an easy to construct whiteboard framing system that securely holds the 4' x 6' (1.22m x 1.83m) or the 4' x 8' (1.22m x 2.03m). It includes casters for portability and is extremely heavy duty.

The parts of the Portable Video Whiteboard Stand are identified and easy to follow assembly instructions are included below:

## COMPONENTS:

One (1) Top Rail  
One (1) Middle Support Rail  
Two (2) Upright Support Posts  
Two (2) Stand Base w/Casters  
Screws and Hardware  
Manual

## ASSEMBLY INSTRUCTIONS:

**Step 1:** Unpack and account for all pieces described in the COMPONENTS section above.

**Step 2:** Start by laying the two (2) Upright Support Posts on the ground, either 6' (1.83m) or 8' (2.03m) apart, depending on the model, with the 45° angles on the top facing inward and the angle iron flange facing forward.

**Step 3:** Lay out the Top Support Rail and the Middle Support Rail between the Upright Support Posts with the angles facing forward. Slide the fittings on the Upright Support Posts into the Middle Support Rail and use four (4) screws to attach the Middle Support Rail, but do not tighten down completely. Pull the 45° angle parts of the Top Rail and Upright Posts together and attach the four (4) screws on the side and the four (4) screws on the top and tighten down.

**Step 4:** Tighten down all of the screws at this time. All the angles in the center should be on the same plane.

**Step 5:** Attach the base and wheel assemblies using four (4) screws on the inside and four (4) screws on the outside. Stand up the assembly and note that when the whiteboard is installed within the opening, this leg system will be very stiff.

**Step 6:** This next step requires 2 or 3 people. Lift the whiteboard and set it into the frame, feed the cable through the opening and slide it back against the angle iron snugly. Have one person hold it in place and use the 22 #8 self-tapping sheet metal screws to attach the whiteboard frame to the angle iron from the back.

## HARDWARE WARRANTY:

Please see the Vaddio website at <http://www.vaddio.com> for the Vaddio Statement of Warranty for all Vaddio Products. The Statement of Warranty covers the policies and procedures of the Hardware Warranty, Exclusions, Customer Service, Technical Support, Return Material Authorizations (RMA), Voided Warranty, Shipping, Handling and Products Not Under Warranty. The Vaddio Warranty Statement supercedes all other published warranty statements in content and coverages. Vaddio Technical Support can be contacted through the Vaddio website or through e-mail at <mailto:support@vaddio.com>.
