

NEW! WORLD'S FIRST QUAD SDI to HDMI MULTIVIEWER UNDER \$1000

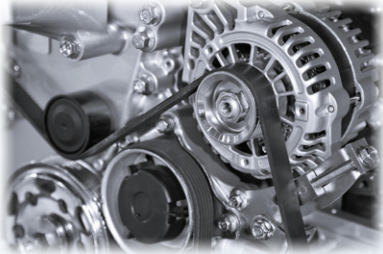

QUAD SDI to HDMI MULTIVIEWER for 3G/HD/SD

If you are like most broadcast engineers and A/V professionals, you encounter many situations where you need to monitor multiple 3G-, HD-, or SD-SDI feeds. The new Matrox MicroQuad lets you use an affordable HDMI display to view your video signals. Ideal for OB vans, on-set productions and live events, Matrox MicroQuad is a small, easy-to-use device. Simply connect power and up to four SDI inputs, all controls are on the unit itself, no computer is required.

Monitor up to four SDI feeds inexpensively

On a single HDMI display in quadrant view, Matrox MicroQuad lets you monitor up to four SDI inputs that can be 3G or HD or SD.

Scale using the powerful 10-bit engine

Matrox MicroQuad always ensures a crisp, artifact-free monitoring experience thanks to its state-of-the-art scaling algorithms with advanced filtering.

Toggle to full screen view

At the touch of a button, Matrox MicroQuad lets you toggle to a full screen view of any one of your inputs and its associated audio.

Synchronize your inputs

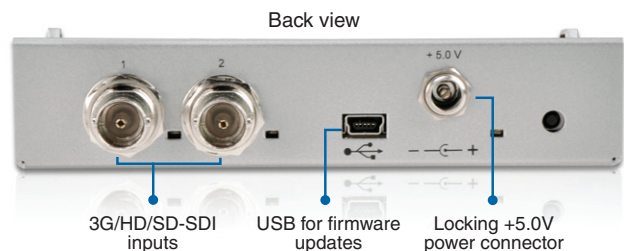

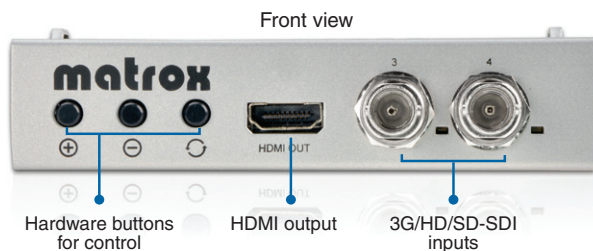

Matrox MicroQuad will take non-genlocked SDI signals and synchronize both video and audio on the HDMI output.

Monitor audio

Use the selection border in quadrant view to select the audio source you want sent to the HDMI display.
