PRE-ASSEMBLED. PRE-TESTED. READY-TO-INSTALL.

Camera Packages

Now! More choices for even more applications.

Camera, lens, and housing

With the newly expanded line of **Ready-to-Go** Camera Packages, Panasonic offers you more ways to simplify and streamline your installations dramatically.

Each package comes as a complete, ready-to-install unit: a camera body, lens, and appropriate housing - fully assembled AND pre-tested for you.

About all you need to do is open the box, mount the camera, and connect your video and power. It's that simple, and that fast.

More choices, more flexibility than ever

Panasonic has added an array of new packages to the line, to offer you a far *wider* range of camera, lens, and housing options that let you satisfy far more applications and environments. You're not limited to just a few 'generic' combinations.

Choose from indoor and outdoor packages, color or black and white, an array of vari-focal lenses, standard or P-T-Z cameras, housings, domes, and even pressurized dome units. All designed for fast installation.

Simpler to buy, easier to manage

Ready-to-Go Camera Packages make it *much* easier to order cameras for a job. Instead of managing dozens (or even hundreds) of separate components, just select the Ready-to-Go package you need. Your complete unit arrives in one box, under one model number.

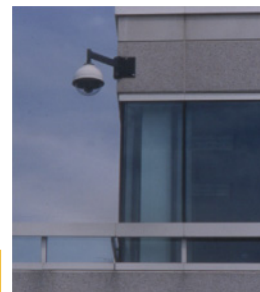

It means fewer parts and pieces to keep track of, and less potential for errors and delays.

Less labor, faster installations

Since each package comes ready to install right out of the box, you won't waste time and labor matching up parts and assembling components. Just unpack the camera and mount. Chances are, you can cut your installation schedule significantly, while lowering your labor costs at the same time.

Pre-tested, too

Each Panasonic Ready-to-Go Camera Package is expertly assembled for you, including internal connections. Your assembled unit is then tested *before* it's shipped, to assure that your package is in working order and ready to install.

Pure Panasonic quality

Every component in every Ready-to-Go package delivers the exact same quality and reliability you expect from Panasonic. (They are, in fact, the same components you can order separately if you wish.) The only difference is, they are pre-assembled into field-ready packages.

A Three-Year Limited Warranty

All Panasonic Ready-to-Go Camera Packages are backed by a three-year Panasonic limited warranty, which includes *all* components of the package.

To learn more about streamlining your installations with Panasonic Ready-to-Go Camera Packages, just contact your Panasonic representative, or visit us online at www.panasonic.com/cctv.

Indoor Fixed Camera Packages

When your indoor installation calls for fixed cameras, you can use Panasonic Ready-to-Go packages to cover a broad spectrum of applications.

You have your choice of color and B/W cameras and a range of vari-focal lenses.

Indoor Dome Camera Packages

For in-ceiling installations, Panasonic offers you a wide range of Ready-to-Go packages that include both high-end *and* low-cost camera options that help you satisfy almost any budget or requirement.

All models also present the exact same outside design and esthetics, regardless of the inside components. It means you can assure a consistent, uniform appearance throughout the installation.

Outdoor Fixed Camera Packages

For outdoor applications, Panasonic offers you more options and flexibility than any manufacturer.

Your camera choices range from Day/Night cameras, to versatile color cameras, as well as high-resolution 1/2" cameras. Choose from three vari-focal lens types, as well as a broad spectrum of dome housings to suit the application. All include integrated blowers and heaters.
