

Panasonic®

3-CCD Convertible Color Camera

AW-E300
AW-E600

Industry
first!

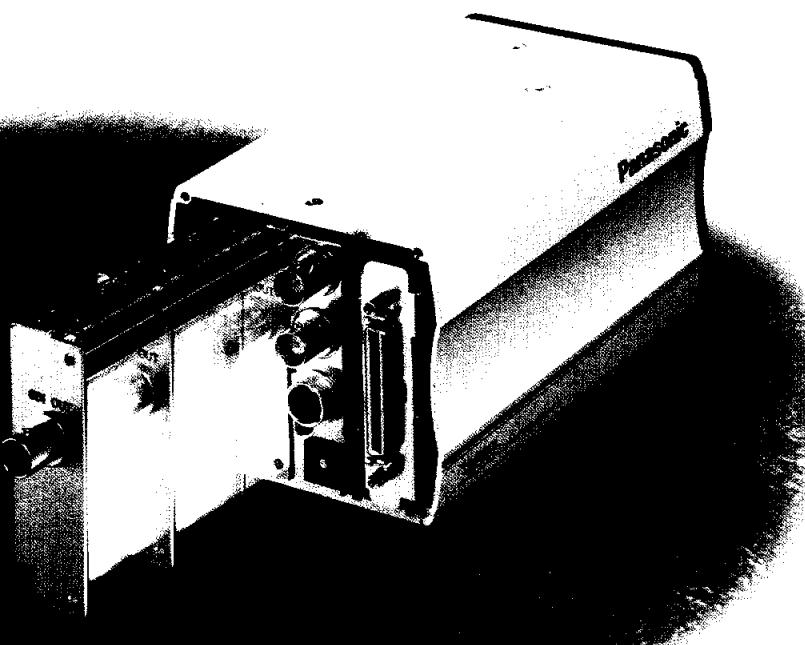

Camera that can be converted for multiple applications by inserting various 'Feature cards'.

World's first - New expandable-function compact camera

Panasonic's first convertible camera brings a more customer oriented approach to the Professional Video market by allowing you to choose only the major features your applications demand while drastically reducing cost.

E300

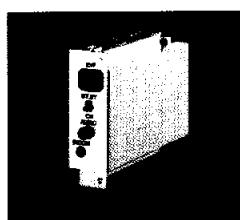

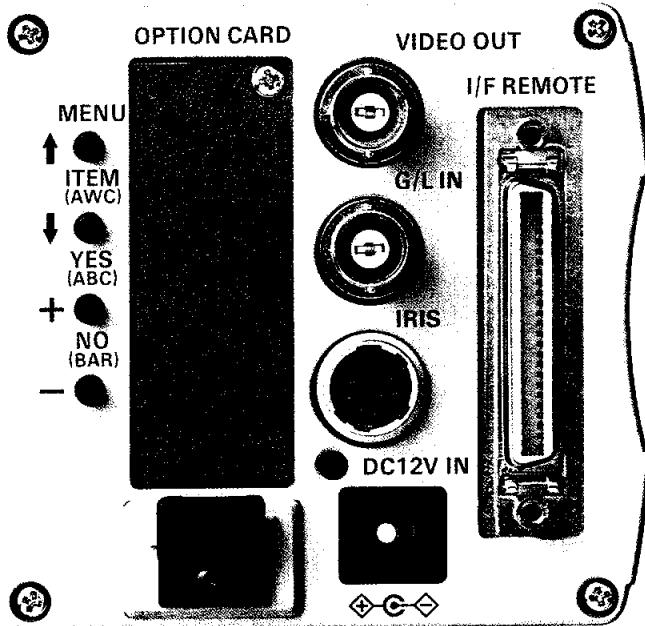

E600

Employs an individual feature card system Compatible with a wide range of uses.

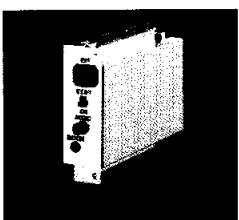

Feature cards can be inserted in the unique option slots. A single camera can be used for a variety of production purposes. By including only the functions required, ease of operation is enhanced.

A wide range of cards is available, including SDI or studio cards, and high-sensitivity cards for filming in dark locations. This system also enables easy expansion for future conversion to digital use.

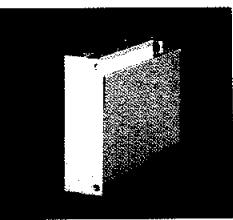

**Studio card 1
AW-PB301**

- Output: RGB, Y/Pr/Pb, (Y/C, VBS)
- 5-inch EVF and intercom
- Input/output, tally output compatible

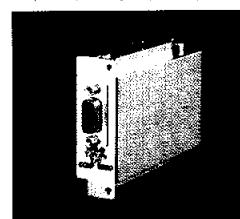

**Studio card 2
AW-PB305**

- Output: (Y/C, VBS)
- 5-inch EVF and intercom
- Input/output, tally output compatible

**High-sensitivity card
AW-PB303**

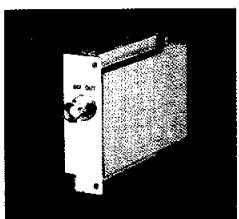

- Field accumulation: Max. 2 sec.
- Minimum illumination AW-E600/Pseudo video: 0.0025 lx AW-E300/Standard video: 0.015 lx

**RGB card
AW-PB302**

- Output: RGB, SYNC, Y/Pr/Pb (Y/C, VBS)

† (Y/C, VBS) from camera body

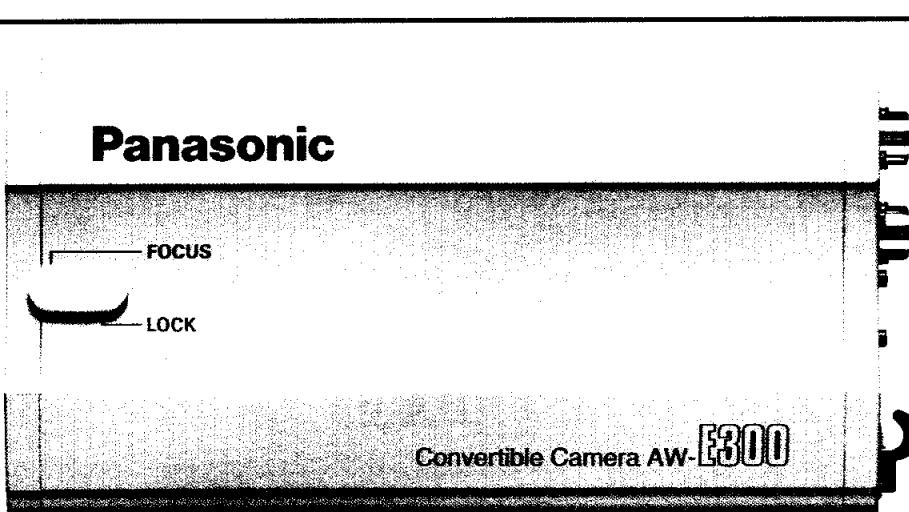

**SDI card
AW-PB304**

- Output: D-1, (Y/C, VBS) (SMPTE259M[4:2:2 SDI])

Compact, yet provides high resolution for professional high-end

Use of a 10-bit DSP gives high specifications with improved horizontal resolution, S/N, and minimum brightness. The unique board-to-board high-density design results in an outstandingly compact and lightweight camera that can be easily ceiling- or wall-mounted.

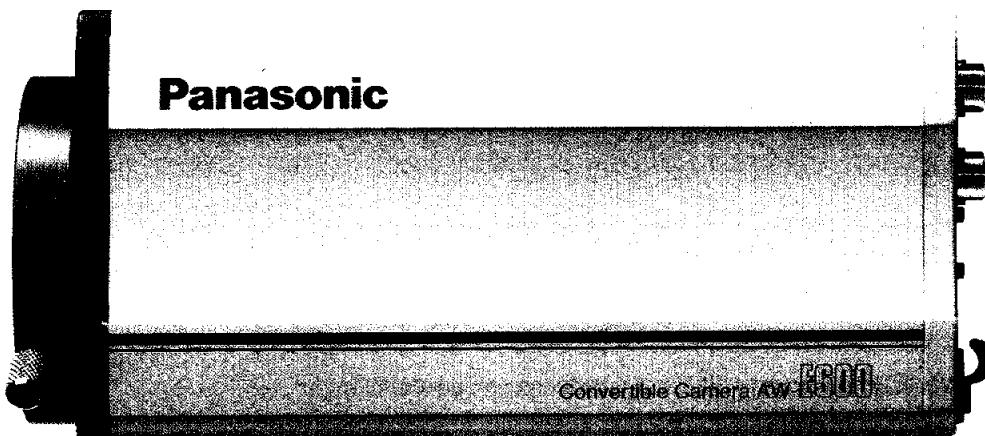

1/3-inch C mount model

Convertible color camera

AW-E300

1/2-inch bayonet mount model

Convertible color camera

AW-E600

Compatible with remote control operation and pan/tilt systems

The camera can be controlled from a remote location using a variety of remote control units. Also, using the camera in conjunction with the AW-PH300 compact and quiet indoor pan/tilt unit enables a pan/tilt system to be set up for unobtrusive filming.

■ Remote control units compatible with AW-E600

Remote control unit WV-RC700A	Maximum distance: 300 m
Remote control unit WV-RC550	Maximum distance: 100 m
Remote control box WV-CB700A	Maximum distance: 50 m

Incorporates four selectable operating modes to suit a wide range of filming conditions

Four modes with preset camera functions can be selected to suit the usage conditions.

Halogen lighting mode	Suited for indoor shooting such as at wedding receptions or other events.
Fluorescent lighting mode	Suited for indoor shooting under fluorescent lighting.
Outdoor mode	Outdoor shooting.
User mode	Allows detailed camera function settings.

●User setting items

Gain, electronic shutter, white balance, corner detail, black stretch, highlight chroma, flesh tone detail, light sensing method, color bar set-up, negative/positive selection, PC control transfer rate, R/B gain, R/B pedestal, black level, video level, son sing area selection, genlock, horizontal phase/color phase, gamma 2 correction level, white clip level, horizontal/vertical detail level, chroma/dark detail correction level, matrix flare correction, etc.

Full range of features and correction circuits, including ATW and ELC

The camera includes a variety of functions such as ATW for automatically correcting the white balance in response to lighting source and color temperature changes, and auto ND (ELC) for automatically adjusting brightness. It also features numerous correction circuits such as chroma-detail correction for displaying dark-colored areas clearly, and dark detail allowing natural outline correction for dark objects.

New-concept production camera allowing a simple

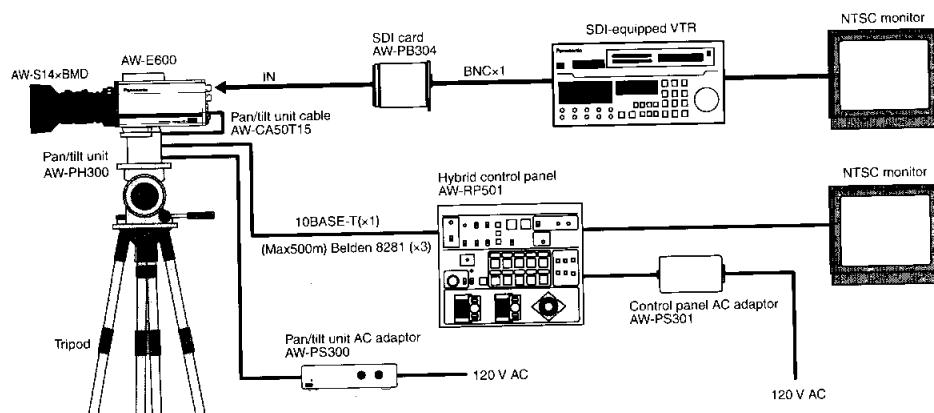

High-resolution D-1 output

SDI card
AW-PB304

Inserting an SDI card allows video exchange via connection to digital equipment without loss of image quality. Ideal for filming in one-person studios for CATV stations and businesses that require high picture quality.

● One-person operation + SDI compatible system

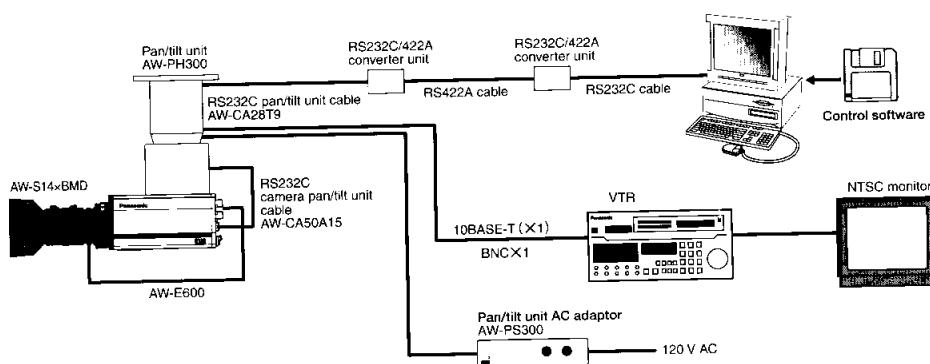

Camera body AW-E600	x1
x14 zoom lens AW-S14 x BMD	x1
Indoor pan/tilt unit AW-PH300	x1
Hybrid control panel AW-RP501	x1
Pan/tilt unit cable AW-CA50T15	x1
NTSC monitors	x2
SDI equipped VTR	x1
Pan/tilt unit AC adaptor AW-PS300	x1
Control panel AC adaptor AW-PS301	x1
SDI card AW-PB304	x1

System can also be configured using AW-E300.

With PC control

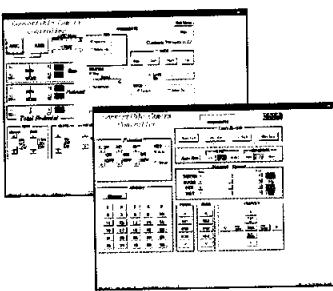

The camera can be mounted on a pan/tilt unit and controlled from a PC via an RS-232C cable. Filming positions can be preset, making this system ideal for filming large numbers of participants at conferences and other events. High sensitivity with a minimum light level of 0.25 lux allows optimum filming even under poor lighting conditions.

● With PC control, up to 30 filming positions can be stored in the memory. (Card not fitted.)

RS232C/422A converter units	x2
Control software (provided by user)	x1

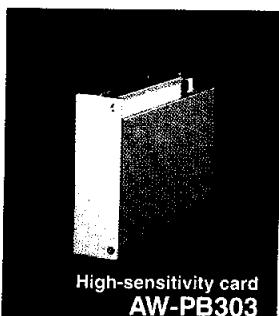

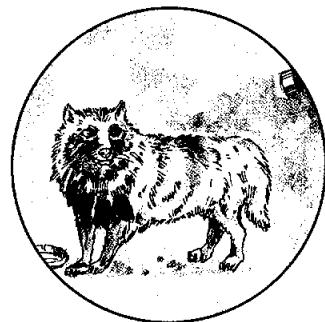

System can also be configured using AW-E300.

Control software sample

configuration to suit a particular purpose

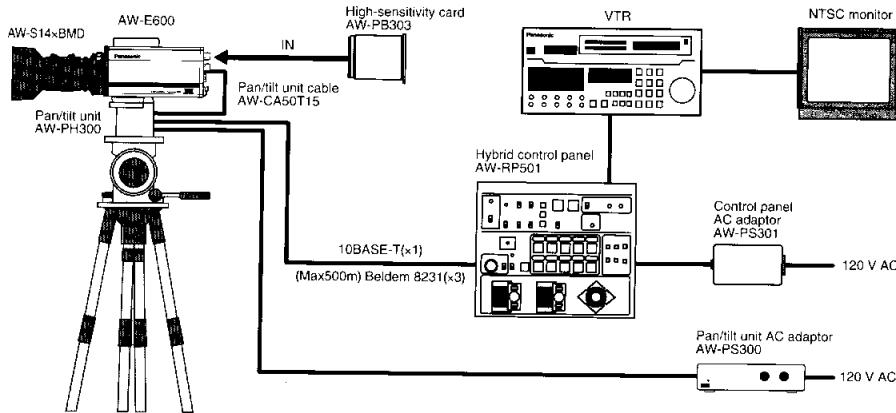

High sensitivity at 0.0025 lux

High-sensitivity card
AW-PB303

Inserting a high-sensitivity card achieves a Pseudo video level of 0.0025 lux, and allows shooting in dark locations. The camera can also be used for weather monitoring or mounted at high locations such as on rooftops or highways for trafficcam applications (Traffic Reports).

● System for shooting in dark locations using a high-sensitivity card

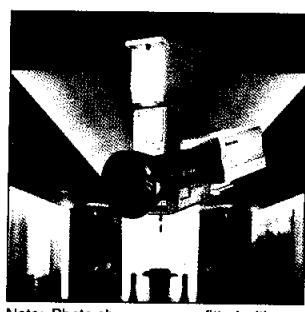

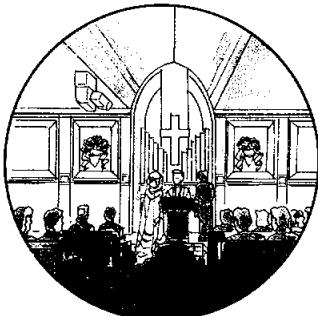

Minimum illumination
AW-E600 0.0025 lx
AW-E300 0.015 lx

System can also be configured using AW-E300.

Camera body AW-E600	x1
×14 zoom lens AW-S14 × BMD	x1

Control panel AC adaptor AW-PS301	x1
High-sensitivity card AW-PB303	x1

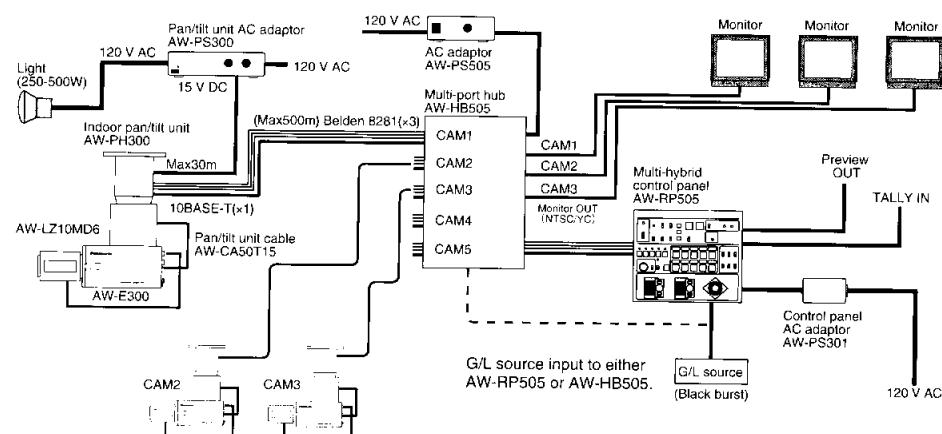

Incorporating new pan/tilt system

Note: Photo shows camera fitted with
AW-LZ14MD55 ×14 zoom lens.

The camera can be used for shooting weddings or a preacher by combining it with the production camera pan/tilt system. Both camera and pan/tilt system are compact, and pan/tilt noise is extremely low compared to existing pan/tilt systems. This allows unobtrusive shooting.

● Pan/tilt-mounted shooting (Card not fitted)

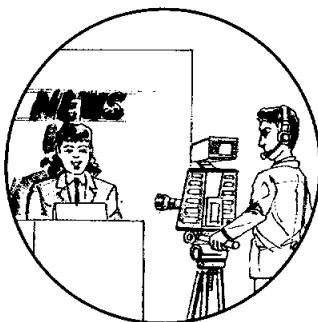

System can also be configured using AW-E600.

Camera body AW-E300	x3
C-mount zoom lens AW-LZ10MD6	x3
Indoor pan/tilt unit AW-PH300	x3
Multi-hybrid control panel AW-RP505	x1
Multi-port hub AW-HB505	x1
Dedicated hub AC adaptor AW-PS505	x1

For studios

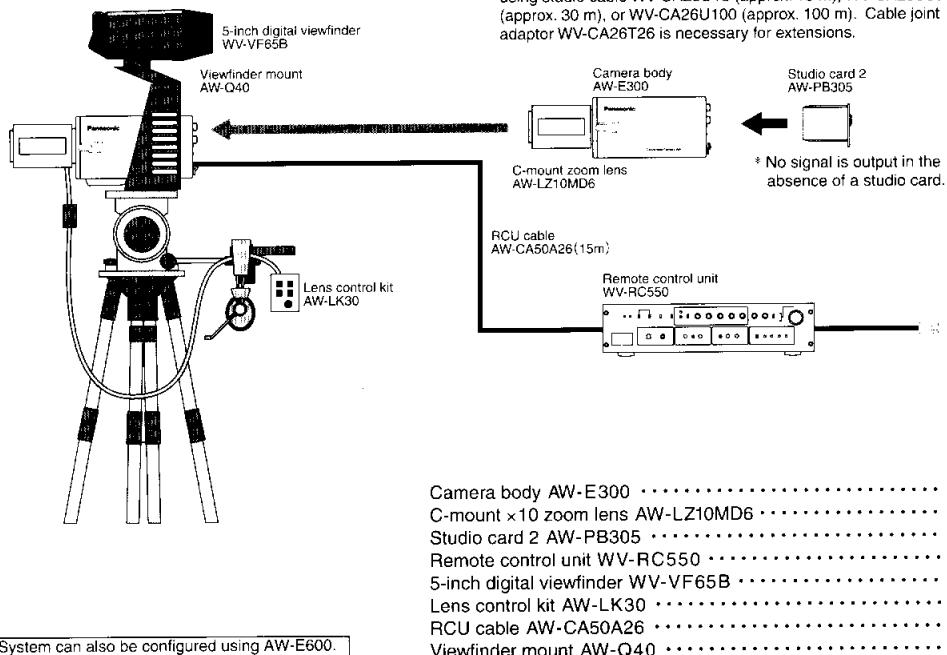

Simple cost effective camera system

Studio card 2
AW-PB305

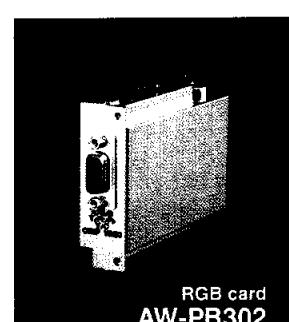

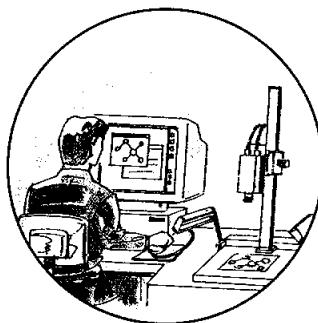

Inserting the AW-PB305 Studio Card 2 creates a studio camera suited for studios. A compact and simple-to-use system can be created while keeping costs low.

● Tripod-mounted shooting

For graphic work

With both PC and RGB output

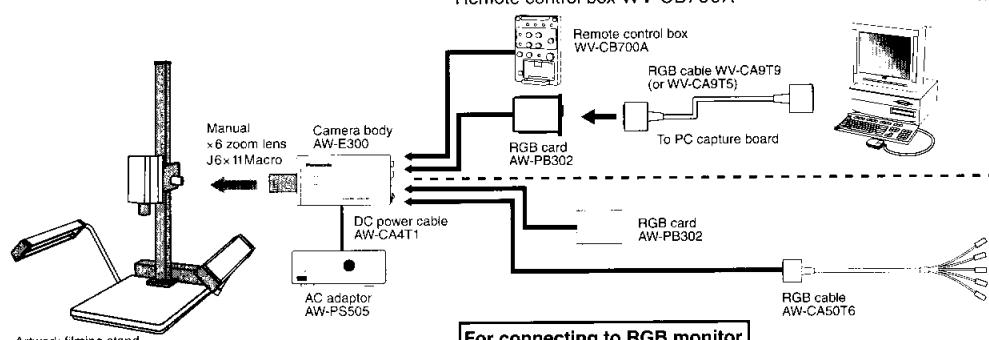

RGB card
AW-PB302

Inserting the AW-PB302 RGB Card allows shooting while the camera is mounted on an artwork stand. It can be used for reading in text and graphics, and for image processing input. The RGB card is compatible with both output to PCs and RGB output.

● Shooting with the camera mounted on an artwork shooting stand

For connection to PC capture board
