

Model: SVP-series

Steel Vented Panels for 19"W EIA racks

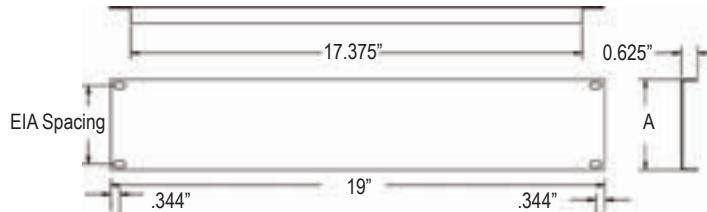

Description:

The SVP-series of rack panels for 19" wide EIA racks are perforated, 18-gauge steel with 0.625" flange for strength and rigidity. These vented panels are finished in smooth, semi-gloss black powder epoxy paint for durable, scratch-resistant performance. Panels have finely perforated .0781" holes on .125" (1/8") staggered centers. They're ideal for providing heat ventilation and protection for equipment mounted in EIA standard racks. Panels are available in single units and bulk-pack cartons.

Features:

- Composition: 18-gauge US steel
- Style: flanged (.625")
- Finish: smooth, semi-gloss black powder epoxy
- Single, 6 or 12-pack cartons
- Made in the USA

Model No.	Description	Former No.	"A" Panel Space (inches)	"A" Rack Units	Carton Pack
SVP-1	Steel Vented Panel (flanged)	L5-191	1.75	1	1
