CTS System Components

System Overview

The CTS system is specifically designed for a variety of performance art. The CTS system has 18 different groups, and each group consists of 14 compatible receiving channels. The CTS system is capable of searching vacant channels automatically, and synchronizing with transmitter accurately.

The CTS system consists of a receiver, transmitter, and power adaptor. The transmitter can either be a handheld or a belt pack (choice of headset or lavalier mic). Systems also include a 1/4" signal cable, (2) AA batteries and a user manual.

All CTS systems include the following components:

- CTS Receiver
- One 1/4" Audio Cable
- Power Adaptor
- Two Antennas
- Single Rack Ears
- User Manual

Handheld Microphone Systems include the following:

- HH85 Handheld Transmitter

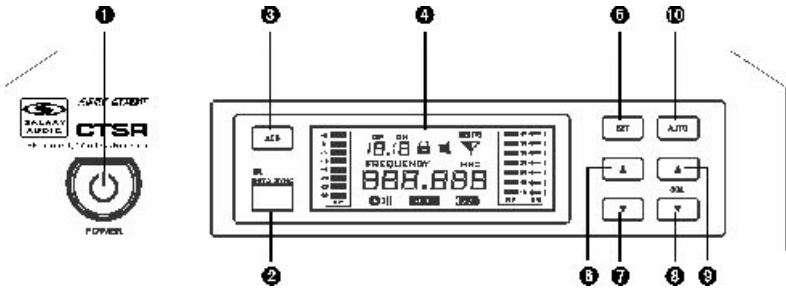

Lavalier/Headset Microphone systems include the following:

- MBP85 Bodypack Transmitter
- Microphone (choice of Lavalier, or Headset)

CTSR Receiver Features

Front Panel

- 1** Power Switch.
With red light indicator, press it one second to turn it on or off.
- 2** IR Port
- 3** IR Sync Signal Button: Pressing button starts 10 second transmitter synchronization indicated by flashing Icon. During the 10 seconds aim the transmitter IR port at the receiver IR port and the transmitter will sync to the receiver frequency.
- 4** LCD Display Panel
- 5** System setting button
- 6** System Menu up button
- 7** System Menu down button
- 8** SQL decrease button
- 9** SQL increase button
- 10** Automatically Search for vacant channels

Functions of the CTSR Receiver

Rear Panel

- ① DC power socket
- ② Balanced audio output socket
- ③ Un-balanced audio output socket: 1/4 inch
- ④ Antenna Socket

Receiver LCD Functions

Display	Function
IR)))	IR port
AF	Audio Level
GP	Current Group Number
CH	Current Channel Number
FREQUENCY	Current Frequency
🔇	Mute, it will disappear when the mic is on
RF	Receiving Signal Status
SQ	Squelch Level Setting
AB	Antenna A B status
AUTO	Automatically Search for vacant channels

Connecting Receiver to the RF Distributor

Rack mount side panel

DC power adapter

Balanced output cable

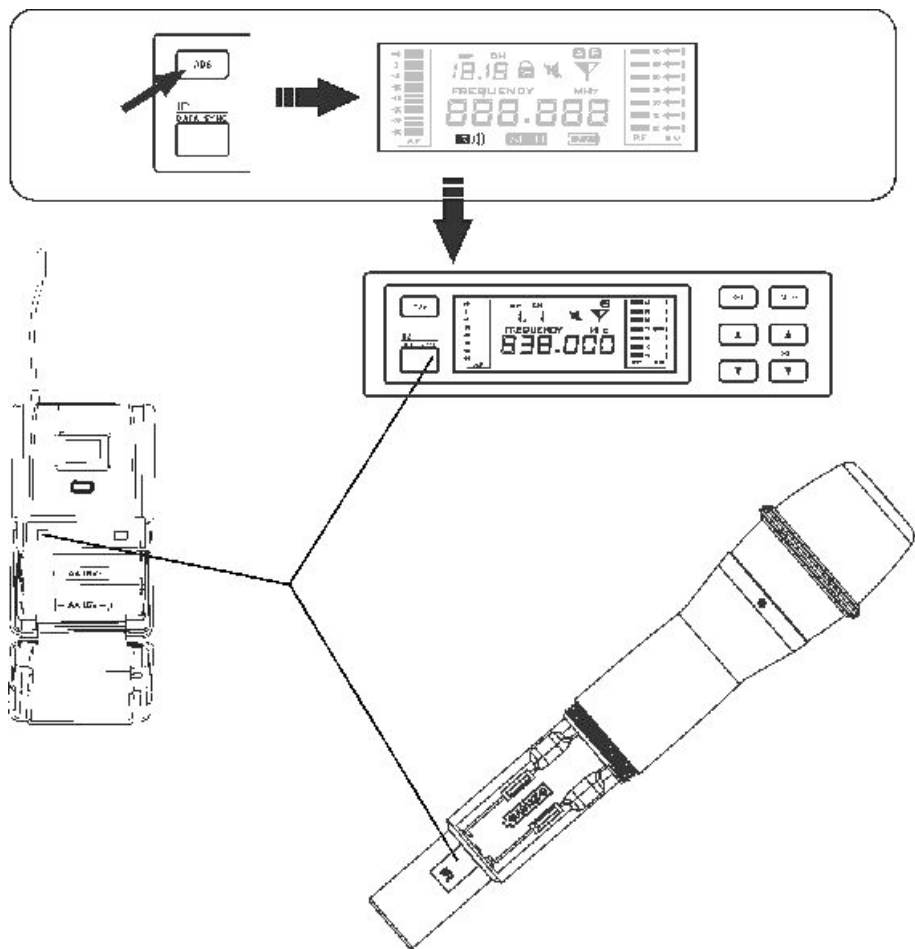

1/4 inch Output cable

System Setup

1. IR SYCN Setting

Press the **ADS** button, the icon  will flash for 10 seconds. During the 10 seconds aim the transmitter IR port at the receiver IR port and the transmitter will sync to the receiver frequency. When the sync is complete the icon  will disappear and the display will return to its normal state.

2. Selecting Frequency

Press **SET** button, the GP flashes to indicate the group can be chosen by pressing the **▲** or **▼** button, to confirm press the **SET** button. It will return back to the original state without any operation within 5 seconds.

Press **SET** to confirm the group selection, the CH flashes to indicate the channel can be chosen, press the **▲** or **▼** button to choose, Press **SET** again to exit setting mode automatically after confirmation.

When choosing frequencies from the "U" group, press **SET** button, and the top three numbers before the point flash, press **▲** **▼** buttons to choose, 1MHz for every push, and press **SET** again to confirm, then the last three number after the point blink, press **▲** **▼** buttons to choose, every step for 25Khz.

3. SQ Setting and Change

The CTSR receiver has a built-in adjustable SQL (Squelch Level) function which silences the output when the receiver does not get a strong or quality signal from the transmitter, instead of reproducing noise. When squelch is adjusted, the threshold of the signal quality or level is adjusted.

Press SQL **▲** or **▼** to change the value. The higher value means the lower reception sensitivity and stronger anti-interference ability. The selection should be based on the use of different locations to achieve the best effect.

System Setup

4. Automatically Search for Vacant Channel

Press **AUTO** , **AUTO** icon will start to flash , then available channels will be shown on the LCD display. For example , the LCD display shows 15, that means there are 15 vacant channels available. Then Press the button **▲** and **▼** to select an appropriate channel. Once a channel is selected, press **SET** to confirm the setting. If no vacant channel can be found within 5 seconds, receiver will automatically return to the original state.

5. Auto Muting

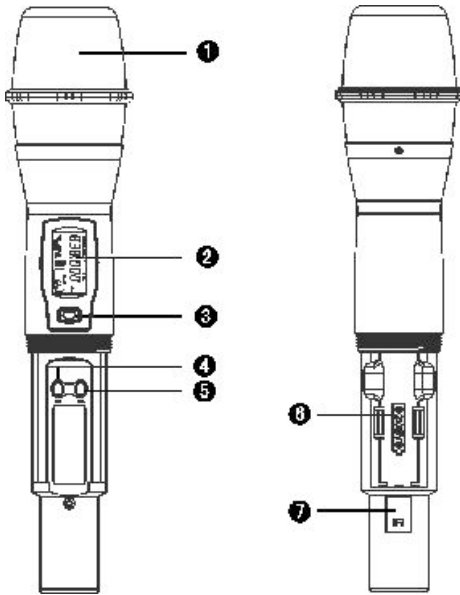

The  icon is displayed in the receiver LCD screen when the frequency is different between receiver and transmitter or the receiver can't receive any signal from the transmitter.

6. Locking and Unlocking

Press **SET** and hold for one second until LCD shows "". At this time, all buttons except Power/Mute will be disabled. All receiver's setting functions are now locked. To unlock, press **SET** and hold it until the "" icon disappears, the receiver is now unlocked.

Functions:

- ① Microphone Grille
- ② LCD Display
- ③ Power and Mute switch: hold for three seconds to power on or off. Click once to mute or unmute output signal
- ④ System setting button.
- ⑤ System selection button.
- ⑥ Battery holder.
- ⑦ IR port: Receiving the IR signal to SYNC the CTSR receiver.

Changing Batteries:

Unscrew cover to access the Battery Tray. Observe correct polarity markings when installing Batteries.

Battery Life

Display	Approximate Hours Remaining (alkaline batteries)
	8 Hrs +
	5 to 6 Hrs
	2 to 3 Hrs
	Low Battery

MBP85 Bodypack Transmitter

Functions:

- ❶ Mini XRL input socket
- ❷ Power/Mute switch: Press it and hold for three seconds can power on or off. Click once can mute or unmute output signal
- ❸ Antenna
- ❹ Low battery indicator
- ❺ Mute indicator
- ❻ LCD Display
- ❼ IR port: Receiving the IR signal to SYNC the CTSR receiver
- ❽ System setting button
- ❾ System Up or Down buttons
- ❿ Battery holder

Battery Replacement:

Fold open the Battery Door as shown. Install Batteries while observing correct polarity markings.

The life expectancy of two alkaline batteries is about 8 hours.

Display	Approximate Hours Remaining (alkaline batteries)
	8 Hrs +
	5 to 6 Hrs
	2 to 3 Hrs
	Low Battery

How to Wear the MBP85 Transmitter:

Clip the transmitter to belt ①, or slide a guitar strap through the transmitter's clip ②, as shown in the diagram at left.

For best results, slide the transmitter until the belt is pressed against the base of the clip ①.

Microphones for bodypack transmitter

HS-U3BK Headset Microphor

Polar Patten: Unidirectional
Sensitivity: $-65\text{dB} \pm 2\text{dB}$
Frequency Response:
50Hz-18KHz
Output impedance: $\leq 2\text{K} \Omega$
S/N Ratio: $\leq 38\text{dB}$

LV-U3BK Clip-on Microphone

Polar Patten: Unidirectional
Sensitivity: $-64\text{dB} \pm 2.2\text{dB}$
Frequency Response:
100Hz-20KHz
Output impedance: $2\text{K} \Omega$
S/N Ratio: $> 44\text{dB}$

This is just a sample of the many headset options available from Galaxy Audio.

Main Functions Description of Transmitters

Display	Function
	Transmitter Output Power
	Battery Status
	Current Frequency
	Mute Symbol
	Transmitter Output Level
GP	Current Group Number
CH	Current Channel Number
	Function Locked Indicator

Handheld and Bodypack Transmitter

Transmitter gain adjust:

Press ,  symbol flashing, press the  button to change the relative level in dB. (-9dB, -6dB, -3dB, 0dB, 3dB) then press the  button again to confirm it or press on Mute button to exit the setting.

Transmitter RF Power adjust:

Press  twice, the signal icon  flashes, press the  button to change the relative output level in mW. (5mW, 10mW, 20mW) then press  again to confirm it or press on Mute button to exit the setting.

Mute setting:

Press  once, the transmitter will be muted right away and the icon  displayed, press one more time to unmute it.

* Button  on handheld microphone has an identical function as the button  on bodypack transmitter.

Handheld and Bodypack Transmitter

Current Frequency Checking:

Press **(SEL)** button to show the current frequency, press **(SEL)** to return.

If no operation was performed within 5 seconds, the display will return back to normal display automatically.

Battery Status Indicator:

When the battery is low, the display shows an empty flashing battery icon . The battery status of transmitter and receiver is synchronized.

When the battery is lower than 1.6V, an empty battery icon and Lo will appear on the display for about three seconds, then an internal control circuit will force the transmitter into off state automatically.

We recommend users change to a pair of new batteries when the battery icon shows as 30%.

Lock and Unlock Setting:

Press **(SEL)** button and hold it until LCD shows "🔒". At this time, all buttons except Power on/off will be disabled. All transmitter's functions are now locked.

Press **(SEL)** and **(SEL)** buttons continuously back and forth (as shown below) three times to unlock.

Tips for Improving System Performance

- Maintain a line of sight between transmitter and antenna.
- Avoid placing the receiver near metal surfaces or any digital equipment (CD players, computers, etc).
- Keep the receiver away from the wall and over 1m to the ground.
- Cellular telephones, two-way radios and other RF transmitters can interfere with the transmitting frequencies, maintain a distance from interfering equipment.

Troubleshooting

Issue	Indicator Status	Solution
No sound or faint sound.	Transmitter ON Indicator stop flashing	Turn on transmitter. Make sure the +/- indicator on battery match the transmitter terminals
	Power indicator off	Make sure AC adapter is securely plugged into electrical outlet and into DC input connector on rear panel of receiver.
	Receiver RF indicator glows	Turn the receiver up Turn up the Gain adjustment switch in the transmitter Check the power connection of the receiver and amplifier or mixer
	Receiver RF indicator off, transmitter indicator ON	Take the receiver away from the metal objects Check whether there are obstructions between receiver and transmitter Move the transmitter near the receiver Check the receiver and transmitter whether use the same frequency
	Transmitter low battery indicator ON	Change the batteries in transmitter.
Distortion or unwanted noise bursts.	Receiver RF indicator ON	Remove nearby sources of RF interference (CD players, computers, in-ear monitor systems, etc.)
Distortion level increases gradually.	Transmitter low battery indicator ON	Replace Transmitter batteries.
Sound level different from cabled guitar or microphone, or when using different guitars.		Adjust Transmitter Gain and Receiver Volume as necessary.

Specifications

CTSR System:

Available Channels: 920 Selectable Frequencies
(18 groups of 14 channels)

Band: UHF Frequency

Operating Range Under Typical Conditions: 300'

Audio Frequency Response: 60Hz - 16KHz

Note: battery characteristics may limit this range.

Receiver: CTSR

Frequency Range: CODE D 584~607 MHZ
CODE L 655~679 MHZ

Channels: 920 Selectable Frequencies
(18 groups of 14 channels)

Power Requirements: 12Vdc, 500mA

Bandwidth: 24 MHz

Sensitivity: -102 dBm

Signal-to-noise ratio: >105 dB(A)

Frequency Response: 60 Hz - 15 KHz

Output Level: 8 dBu Max

Output Connections: Balanced XLR,
Unbalanced 1/4"

IR Sync transmitter with receiver

Dimensions: 8.34" W x 6.29" D x 1.73" H
(212mm x 160mm x 44mm)

Weight: 1.98 lbs (900g)

Handheld Transmitter: HH85

Polar Pattern: Cardioid

Element Type: Dynamic

LCD Display: Frequency, Battery Life,
Mute, Gain, RF Power, Lock

Selectable Power: 5, 10, 20mW

Selectable Gain: -3, 0, 3, 6, 9

Power Requirements: 2 "AA" Batteries alkaline
or rechargeable batteries

Battery Life: About 8 Hrs dependent on power setting

Dimensions: 9.68" x 2.08" (246mm H x 53mm W)

Weight: 8.8oz (250g)

Bodypack Transmitter: MBP85

Frequency Range: CODE D 584~607 MHZ
CODE L 655~679 MHZ

LCD Display: Frequency, Battery Life,
Mute, Gain, RF Power, Lock

Selectable Power: 5, 10, 20mW

Selectable Gain: -3, 0, 3, 6, 9

Power Requirements: 2 "AA" size alkaline or
rechargeable batteries

Battery Life: About 8 Hrs dependent on power setting

Dimensions: 3.85" W x 2.51" H x 0.90" D
(98mm x 64mm x 23mm)

Weight: 3.17oz. (90g)
