Digital Audio AES/EBU  
1x2 Distribution Amplifier

## DIGITAL AES/EBU AUDIO 1X2 DISTRIBUTION AMPLIFIER

When a simple solution is made simple to deploy, it is a winner for every job. This low cost digital splitter is a state-of-the-art 1x2 splitter distribution amplifier. Though passive it employs custom designed transformer coupling technology to deliver performance with no apologies.

It is fitted with high quality XLRs for I/O interface: Female 3-pin XLR for input and two Male 3-pin XLR for the outputs. There is not need to terminate the unused output.

**NOTE: You can extend the distance by connecting a standard digital cable up to 100 feet maximum to the input. The output cables can only be extended a maximum 12 feet. It is recommended that high-quality digital audio cable be used for any interface with this product.**

*Application: In-Line Analog Confidence Monitoring*
