

# ULTRA GO PAR 7X™

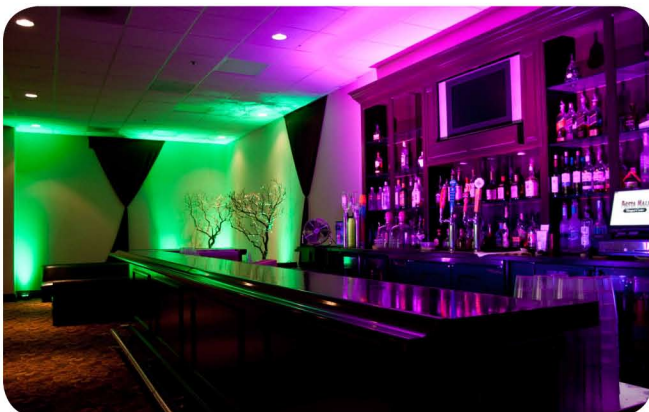

The ADJ Ultra GO Par7X is a rechargeable lithium battery powered, low profile LED par fixture that is great for up lighting or wall washing with the freedom to set up anywhere without the restriction of power. This light is powered by seven, three watt Tri color (3 in 1) LEDs for smooth, rich color mixing and its 40 degree beam angle will provide excellent coverage. On average this fixture will operate for up to 5 hours (full on) from a full charge and much longer when using single static colors or fade scenes. With on board manual control or DMX control you can drastically reduce set up time with the ADJ Ultra GO Par7X.
