

Panasonic Panaboard Up/Down Unit Introduction

UE-608030, UE-608031, UE-608032

Panasonic's Up/Down Stand Kit and Up/Down Wall Mount Kit is for use with our Elite Panaboards including the UB-T780BP, UB-T780, UB-T781, UB-T781W, UB-T880 and the UB-T880W.

These kits allow the Elite Panaboard to be placed at the exact height the user desires, and can be adjusted when necessary. For instance, this allows the Elite Panaboard to be placed at a low height when it is being used in an elementary school setting, or at a higher height when being utilized by adults. In addition, the projector can be installed at the top of the stand so that the screen surface will be less likely to be covered by shadows, making the Elite Panaboard more flexible in any setting.

Be aware that the items are purchased separately and used for your specific total Elite Panaboard solution. The two variations are listed below, including an Up/Down Stand Kit and an Up/Down Wall Mount Kit.

Up/Down Stand Kit

The Up/Down Stand is for use when you want your Elite Panaboard to have the ability to be moved either around the room or room to room. The large size casters provided enable great ease of movement, and the projector arm has the ability to rotate so that the board and stand can be rolled easily through doorways. When mounted on the Stand Table Unit, the adjustable range of height of the board at its highest point is 6' 11" and at its lowest point is 5' 5".

The Up/Down Stand Kit requires the following components:

Model			
Model #	UE-608030	UE-608031	UE-608032
Description	Up/Down Unit	Stand Table Unit	Short-Throw Arm Unit

Up/Down Wall Mount Kit

The Up/Down Wall Mount Kit is for use when you want your Elite Panaboard to be fastened on a wall in your room, with the additional ability to adjust the height of it according to the user's needs or your needs.

The Up/Down Wall Mount Kit requires the following components:

Model		
Model #	UE-608030	UE-608032
Description	Up/Down Unit	Short-Throw Arm Unit

Short-Throw Projector Arm Unit Compatibility

Our Short-Throw Projector Arm unit has been tested with a variety of projectors. It is fully compatible with the following: Panasonic PT-ST10, Sanyo LP-WXL46 (S), Epson EB-410W, Optoma EX525ST, Acer S1200, Benq MP728ST, Benq MP772ST and Benq MP776ST.
