

# Vinten

Vision  
blue5

## Perfectly balanced

- Perfect counterbalance
- Infinite adjustment of both counterbalance and drag
- Genuine broadcast quality
- A trustworthy Vinten tripod system which is effortless to use

The new **Vision blue5** pan and tilt head is the latest addition to the "Vision blue" range of lightweight, compact and refined pan and tilt heads for today's professional ENG and corporate user who has come to expect uncompromising performance from the premium quality of a Vinten system.

Offering genuine broadcast quality performance, the **Vision blue5** offers the unique combination of continuous counterbalance and infinite drag. It provides a full  $\pm 90^\circ$  of smooth tilt movement with a counterbalance range of 5.5 kg to 12 kg (@100 mm CofG), perfect for supporting the latest portable digital cameras.

In addition to the 'infinitely variable' LF drag system for silky smooth framing and on-demand whip pan movement, plus Vision's perfect balancing system for total control, the new **Vision blue5** also has the added advantage of an illuminated levelling bubble for quick and convenient set-up.

# Vision blue5
