

# X Digi-Mix Card

## APOGEE X-SERIES

### Extend the Life of Your Pro Tools Mix System...

The Apogee X-Digi-Mix expansion card for the Rosetta 800 (and all future X-Series hardware) allows for direct connectivity between Pro Tools Mix systems and the Rosetta 800 8-channel AD/DA converter, providing superior quality conversion to Pro-Tools Mix users without the need for an additional interface. Mix users will find the X-Digi-Mix card offers them the ability to connect the Rosetta 800 directly to their workstations, effectively extending the life of their Mix systems for years to come.

Apogee's Rosetta 800  
and X-Digi-Mix Card  
for Pro Tools | Mix Systems

### X-Digi-Mix Card Features

- ▶ Standard Digidesign peripheral connector for interfacing directly to Mix Core or Farm cards.
- ▶ Superclock (FSx256) output for convenient integration into existing Pro Tools configurations.
- ▶ With necessary Pro Tools hardware expansion, multiple Rosetta-800s may be connected into a system.
- ▶ Rosetta 800 may be used alongside an Apogee AD-8000 or Trak 2 outfitted with an AMBUS-Digi8+ card as well as any other Pro Tools Mix-compatible hardware.
- ▶ Multiple slaved Rosetta 800s may lock to Word Clock or directly to the Digi-mix card for low jitter synchronization of the Pro-Tools system.
