## APPLICATIONS

The CUSTOM STREET is another headphone of the CUSTOM series. It can be used with mobile phones, mobile players or a stationary PC at home.

A special feature of this headphone is the changeable sound which can be selected in three stages from a clear, analytical sound to a rich bass via the "CUSTOM Sound Slider" bass reflex vents at the housing shells. Another property of this "CUSTOM Sound Slider" feature is the more they are closed, the more they attenuate ambient noise considerably. Vice versa no music will penetrate to the outside which could disturb people in the vicinity.

The CUSTOM STREET features a high-quality microphone. Via the remote control integrated in the cable you can accept and end phone calls. Depending on the software of the mobile phone or player (e.g. MP3 player) the remote control can be used for other functions such as music playback.

The versatile design with replaceable accessories gives the headphone a special individuality. By purchasing coloured covers, rings, ear and headband pads the user can change the look of the headphone at any time.

The single-sided detachable cable is provided with a gold-plated mini jack plug (3.5 mm). It is available in different versions and lengths for most various applications.

The movable yokes and adjustable headband of spring steel allow a perfect fit for each head size. Soft, replaceable ear and headband pads ensure a pleasant comfort of wearing.

When not in use the housing shells can be folded inwards and the headphone is stored in the supplied case.
