# SCREW COVER ENCLOSURE

## NEMA TYPE-1 SCREW COVER PULL BOX

### APPLICATION

WIRE GUARD Nema Type-1 Screw Cover Enclosures are designed for use as junction and pull boxes. This box is intended for indoor use primarily to provide protection against contact with the enclosed equipment.

### CONSTRUCTION

Made from 16 gauge, 14 gauge and 12 gauge steel. Flat, removable covers are fastened with screws through keyhole slots which eliminate the necessity of entirely removing the screws when taking the cover off. Various sizes of easily removable concentric knockouts are furnished on all four sides of standard enclosures with knockouts. Enclosures are also readily available without knockouts. Holes are provided in the back of the box for mounting. Flush covers and screw cover enclosures must be ordered separately for flush installations.

### FINISH

Standard enclosures are available in either of two finishes.

- A. High-gloss gray baked enamel inside and out over phosphatized surfaces.
- B. Galvanized steel-no paint.

### MODIFICATIONS

WIRE GUARD can supply holes, cutouts, specially located knockouts, special sizes, finishes, materials, colors, fabricated promptly to your specifications. Please consult the factory for prices and availability.

### PACKAGING

Enclosures are shipped only in standard quantities as listed under pre-pack carton quantity. All enclosures not listing a pre-pack are available individually.

### INDUSTRY STANDARDS

These enclosures conform to the National Electrical Manufacturers Association (NEMA) standard for Type-1 (General purpose) enclosures. All enclosures are listed by Underwriters' Laboratories, Inc. (UL).
