

ANY SPOT®

WIRELESS MICROPHONE SYSTEMS

TOUR GUIDE KIT

The Tour Guide System is a lightweight, multi-channel wireless system that can be used in museums, conference rooms, churches, hotels, manufacturing plants, and by rental and production houses. The Tour Guide system operates in the UHF band and can allow for a speech or presentation to be translated into another language and broadcast to listeners. It can also be used in loud or noisy environments for tours of manufacturing plants and facilities.

The Tour Guide system can be used with either the AS-TVH2 handheld microphone, AS-TVBPT Pendant transmitter, or the AS-TXRM Table Top transmitter. The AS-TVBPT Pendant has a built-in microphone, and comes with a removable lanyard and belt clip for hands-free operation. The AS-TXRM Table Top transmitter gives users the ability to send a signal directly from a mixing board, or other device, to the listeners.

The AS-TVBPR receivers are lightweight (3.2 oz.) with easy turn on/off volume knob. The backlit LCD screen allows for easy visibility of the channel settings and battery life. The receiver also comes with a removable lanyard and belt clip for hands free operation.

Standard system includes 4 AS-TVBPR Receivers. Additional Receivers are available individually or in a 5 pack.

Choose from a Pendant, Handheld, or Table Top Transmitter
