

IRIDEON™ FPZ

Lighting with distinction

Source Four quality performance in a sleek, powerful design

Irideon™ FPZ combines the optics and features of Source Four® excellence into an elegant, streamlined exterior, perfect for museums, lobbies, and retail environments.

Truly a Source Four fixture at heart, Irideon FPZ takes the best of the Source Four Mini design and carries it to the next level. What sets it apart? Lockable three-plane shutters, zoom optics, and the ability to dim using either DMX or a local dimming knob on the DataTrack® adapter. But the beam is the real beauty; Irideon FPZ is 33 percent brighter than Source Four Mini LED and every bit as pleasing to the eye with a wide selection of models with various color temperatures. FPZ ships with an integrated track fitting for use with ETC's DataTrack system (or Eutrac® in 230V markets).

In the end, you get the flexibility you need to create the beautiful light you want, from a sleek, integrated design that doesn't dominate your space.

Built on the Source Four platform, Irideon FPZ is packed with additional features and a beam that is 33% brighter than Source Four Mini LED.

More than you expect

- Over 800 lumens, 33% brighter than Source Four Mini LED
- Lockable, three-plane shutters
- Zoom optics, 25-50 degrees
- DMX or locally dimmed

The Source Four touch

- Exceptional optics, beam, and brightness
