VIA Site Management Software

MODEL:

Quick Installation Guide

1 Server Requirements

1.1 Hardware Requirements

Operating System	Windows Server 2012
RAM	Minimum: 4GB
	Recommended: 8GB
Storage Space	Minimum: 50GB
	Recommended: 250GB
LAN	Gigabit LAN

1.2 Software Requirements

- The server on which VSM is installed cannot host any kind of Web server or Database server, and so on.

- Set the firewall to allow communication on the following ports:

    - 5555 (TCP - incoming and outgoing)

    - 9988 (TCP - incoming and outgoing)

    - 80 / 443 (TCP - incoming and outgoing)

1.3 Installation

To install VIA Site Management:

- Copy the install package (VIA-Server-1.1.xxxx.xx) to the server

- Navigate to the save location

- Double-click the install package

The installation process is automatic and does not require any user intervention.

Once installed, it generates a "VSM_License" application icon on your desktop for license activation (if needed, refer to the VSM Web Admin Manual). Do not remove it.

1.4   Uninstall Instructions

From Control Panel→ Programs and Features, uninstall:

- VIA_HQServer
- Uninstall MySQL Server and delete C:\Mysql folder and C:\ProgramData\Mysql folder to cleanup
