

LT-88B

LT Series Multi-tiered, Heavy-duty, Extra Tall Lighting Tree with Patented Aluminum Tripod Stand

Patented Die-cast Metal Collar

The strongest leg fitting made, the collar on the TS-88B's tripod leg fitting prevents over-tightening and breakage issues associated with all plastic designs. It also features a Quick Release design allows faster setup, and the same force to be applied every time (similar to the same type of design used in most high-end bicycle seat posts). Plus, our die-cast fitting is 30x stronger than ABS or Nylon plastic used by the competition.

LTV-24B Vertical Extension

The LTV-24B is a 24-inch vertical extension tube that fits on top of the LT-99. While the tripod stand is plenty tall on its own, by adding the LTV-24B to the stand, we make it plenty tall for all your lighting needs! With the addition of the LTB-48B t-style lighting crossbar and LTB-24B, you have a professional, sturdy lighting tree.

LTB-48B T-style Lighting Crossbar

The LTB-48B is a 48" T-style lighting crossbar that features four pre-drilled holes for mounting your lighting equipment to - we've even included mounting hardware to get you started. It's constructed with thick-walled aluminum so while it's amazingly light, it's rated for use with C-clamps (not included). The LTB-48B also includes two UNF-150 mounting brackets for mounting lighting equipment, such as dimmer packs, to the lighting tree.

LTB-24B Lighting Sidebars

The LTB-24B is a great and flexible way to add more lights to your Ultimate Support lighting tree. It features two 24" sidebars that mount to the LTV-24B Vertical Extension. The two sidebars are height-adjustable, so you can mount them where you need them on the pole for maximum flexibility. Each LTB-28B sidebar features two pre-drilled holes for mounting your lighting equipment to (mounting hardware included).

Over-sized Heavy Wall Aluminum Tubing

The entire stand (legs, mast, and telescoping tube) uses oversized, heavy-walled aluminum tubing for durability, functionality, and weight savings. The LT-88B will not rust or corrode (thanks to its architectural anodized finish), is very smooth to operate, and is extraordinarily strong yet lightweight.

LT-88B SPECS

- LT-88B #17343 — black
