

Interface Bars:
**Variety of lengths are available
ranging from 11.4" to 130.5"**

Three Display Bracket Options:
7° of Tilt, 10° of Tilt, 15° of Tilt

Features

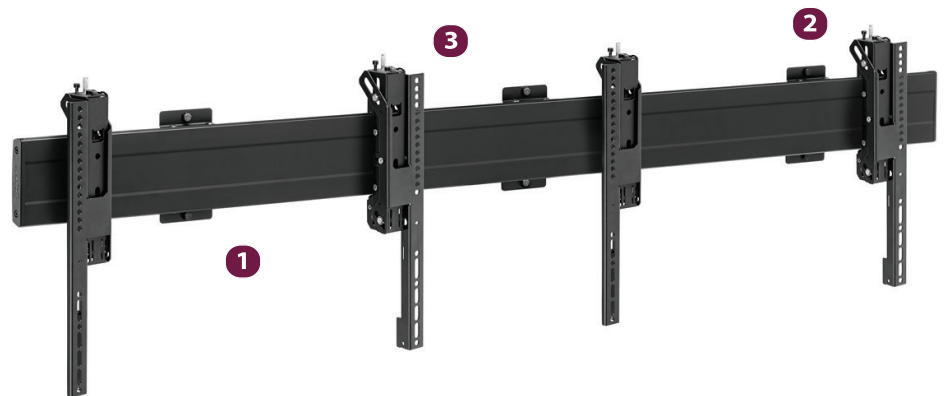

- 1** Symmetry Series system consists of two main components: interface bar and display brackets
 - 2** 6-point (x,y,z) adjustments are easily accessible from the top of each fine tune display bracket
 - 3** Non-adjustable display brackets with tilt offer an economical option
- Quick and easy installation process to attach display brackets to the interface bar. "Click-It" locking feature confirms brackets are secure through an audible noise
 - Designed for multiple attachment configurations including: wall, ceiling, and stand
 - Built-in service kickstand provides 9° of bottom bracket tilt access for fine tune display brackets
 - Designed for scalability and installation efficiency
 - Interface bars are a lightweight aluminum design

A Configurable Modular Display Solution

The Symmetry Series is an easy to use configurable flat panel display mounting solution, designed to provide easy installation and adjustment. The display interface consists of two main components: an interface bar (horizontal fitment) and a set of 2 display brackets (vertical fitment). Multiple display bracket options are available, such as the fine-tune display brackets that offer 6-point (x,y,z) adjustments that are accessible from the top of each fine tune display bracket for precise bezel alignment. Another option is the non-adjustable display brackets with tilt, which offers an economical option.

The display brackets click in place on the interface bar for quick and easy installation. The modular components are designed to reduce installation time by over 40% compared to traditional individual single display mounting systems. The Symmetry Series is one system that can be configured to fit a variety of digital signage needs, including video walls, transportation schedules and menu boards.

Interface bars are available in multiple lengths

Easy to install display brackets with 6-point (x,y,z) adjustments available

L-brackets can be moved anywhere along interface bar to match stud location
