DESCRIPTION

The MVP35 is a rugged, high-efficiency, two-way, full-range loudspeaker system. The system utilizes one LM20™ high-frequency driver coupled to a Pattern Control horn and one 15" woofer for high efficiency and excellent power handling capability. These components are matched to an optimally tuned direct radiating bass-reflex enclosure. The recessed handles, black carpeted exterior and injection molded corners also make this system attractive, rugged and easily transportable.

The MVP35 offers a robust internal crossover with Thermal Link™ Dynamic HF Driver Protection. The crossover is built to last with high quality inductors, precision wound coils and military grade circuit boards. The proprietary Thermal Link Dynamic HF Driver Protection circuit provides both over-current and thermal protection for added performance and reliability.

Designed as a stand-alone full-range loudspeaker system, the MVP35 offers enough bass for most applications. For more demanding applications, extended bass can be achieved by adding a MVP subwoofer. Mounting is easily accomplished utilizing the threaded inserts provided and optional mounting kits.
