

FEATURES:

- Flexible Modular Design
- Output Level LED Indicators
- Up to 96 Total Zones
- Keyswitch Priority Lockout
- Supports 8 Rooms with 12 Presets Each
- Programmable Presets

LEPRECON® ARCHITECTURAL SYSTEM

The Litescape Architectural Series Houselite System is designed to meet a variety of lighting challenges in today's architectural installations. The Litescape panels incorporate a simple, clean and low profile design that will blend into any environment. Litescape architectural panels allow designers to create dramatic "Litescaped" environments that are recalled by the touch of a button.

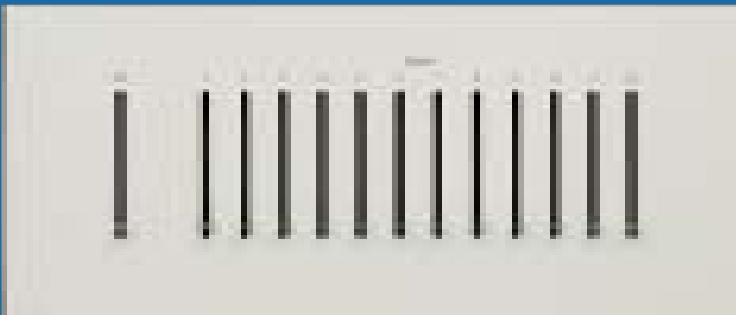

These panels are ideal in applications such as theatres, houses of worship, hotels, convention centers, meeting rooms, schools, restaurants and museums. You can now easily accent works of art and emphasize architectural features or control multiple rooms in hotel ballrooms and convention centers. Litescape panels are perfect for houses of worship to enhance daily services, weddings, youth programs and special events.

The flexible modular design provides comprehensive control for any architectural system. Litescape preset button stations and fader stations are available in wide variety of configurations. The Litescape control panels may also be used in combination with theatrical control systems for seamless integration of both architectural and theatrical lighting control.

All face plates are aluminum and finished in a durable baked on enamel. The color is a neutral, off-white with unobtrusive warm gray graphics. Custom colors are available. Consult factory for cost and delivery time.

COVER PHOTO CLOCKWISE INCLUDES THE FOLLOWING STATIONS:

6 Preset/6 Fader w/Master/Lockout & Off, 3 Preset/3 Fader w/Master & Off, 6 Fader w/Master, 1 Preset w/Off, 12 Preset w/Off

12 Fader Station w/Master

3 Fader Station w/Master

1 Fader Station

LOCKOUT STATION

Lockout Station

The lockout station is a security device that allows you to “lock out” certain stations. By turning the key you can prevent any unwanted changes in the light levels from any of the panels located in public areas.

FADER STATION

Available in 1, 3, 6 and 12 zone configurations with master level fader on 3, 6 and 12 zone models. All feature low profile faders with output level LED indicators on each zone and master fader. All stations mount in standard electrical boxes.

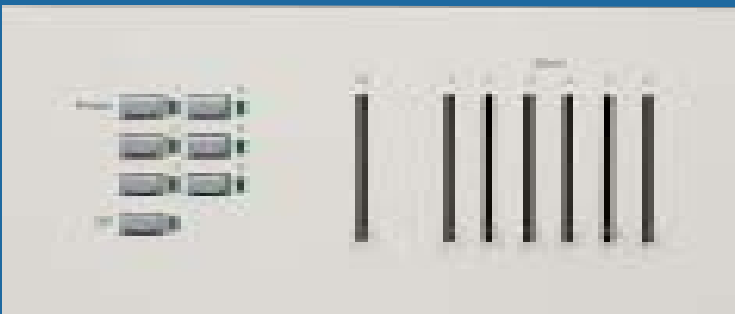

PRESET STATION

Light levels for up to twelve zones can be assigned to any preset. Presets have the capability of triggering sequential cues or any triggered event. Use any zone fader station or the Litescape Wall Dimmer to program presets. Panels are available with 1, 3, 6 and 12 preset buttons with “off” button.

COMBINATION STATION

Preset/Fader combination panels offer a

comprehensive solution to applications where a combination of preset button stations and fader stations are needed. Panels are available in the 3 button/fader with master or 6 button/fader with master configuration, with and without the Lockout function.

6 Preset/6 Fader Station w/ Master & Off

6 Preset Station w/Off

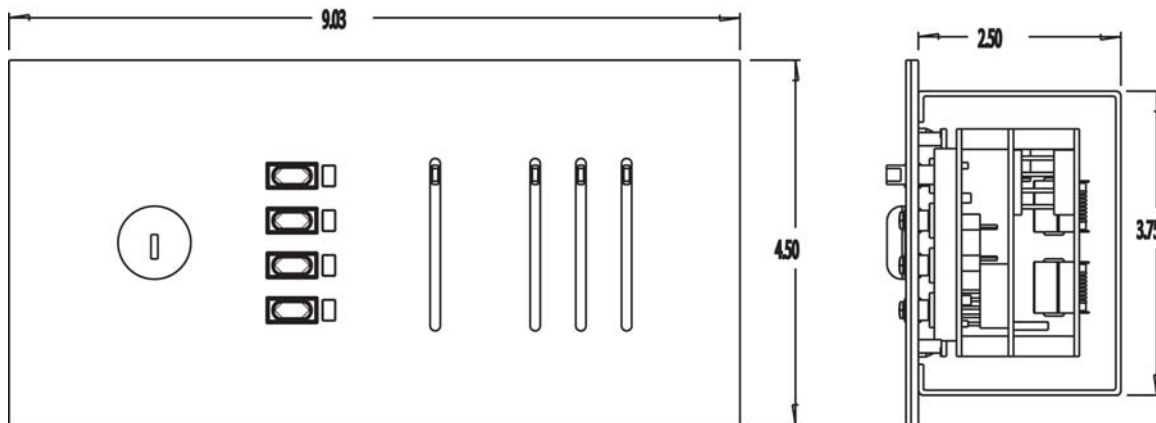

3 Preset Station w/Off

LITELSCAPE HOUSELITE SYSTEM

Model #	Station Description	Outside Station Width in Inches*	Outside Station Width Metric	Outside Gang Size	Inside Gang Size
LHS Lockout	Lockout	3.59	91mm	2 Gang	1 Gang
LHS 1F	1 Fader	3.59	91mm	2 Gang	1 Gang
LHS 1P	1 Preset w/Off	3.59	91mm	2 Gang	1 Gang
LHS 3P	3 Preset w/Off	3.59	91mm	2 Gang	1 Gang
LHS 3F w/Master	3 Fader w/Master	5.41	137mm	3 Gang	2 Gang
LHS 6P	6 Preset w/Off	5.41	137mm	3 Gang	2 Gang
LHS 6F w/Master	6 Fader w/Master	7.22	183mm	4 Gang	3 Gang
LHS 12P	12 Preset w/Off	7.22	183mm	4 Gang	3 Gang
LHS 12F w/Master	12 Fader w/Master	10.84	275mm	6 Gang	5 Gang
LHS 3P/3F w/Master	3 Preset/3 Fader w/Master & Off	7.22	183mm	4 Gang	3 Gang
LHS 3P/3F w/Master & Lockout	3 Preset/3 Fader w/Master/Lockout & Off	9.03	229mm	5 Gang	4 Gang
LHS 6P/6F w/Master	6 Preset/6 Fader w/Master & Off	10.84	275mm	6 Gang	5 Gang
LHS 6P/6F w/Master & Lockout	6 Preset/6 Fader w/Master/Lockout & Off	12.66	321mm	7 Gang	6 Gang

*To determine the back box size for multiple panel combinations, total the outside gang size of each panel and subtract 1 gang. Example 2 + 3 + 4 - 1 = 8 gang back box. To determine the back box size for individual panels, use the inside gang size.
