

HS-1200

6-Input Hand Carry Studio

MSRP: \$3,500

DataVideo's **HS-1200** is the most affordable HD hand carried mobile studio on the market. Switch up to 6 inputs with a portable studio that is excellent for field production applications. Ergonomic controls allow the user to switch seamlessly between video and audio sources and blend high-quality digital content on the fly. The built-in 17.3" monitor displays all incoming video input sources as well and program and preview with tally indicator, on a single multi-view screen; making it a convenient hardware solution.

The fully integrated design of the HS-1200 includes features such as dual Chroma key, Luma key, DSK, PIP, still store, and user memories.
