The DMPS3-4K-300-C from Crestron® offers an all-in-one 4K AV presentation system for classrooms, boardrooms, lecture halls, and videoconference rooms. Delivering a complete, custom-programmable room solution with fully-configurable signal routing and processing is easy and cost-effective using the DMPS3-4K-300-C. In one 3-space rack mount package, it integrates the control system, matrix switcher, video scalers, mic mixer, audio DSP, and amplifier. Built-in DigitalMedia 8G+® and HDBaseT® connectivity affords a streamlined, long-distance wiring solution for remote sources and display devices, and for facility-wide integration as part of a larger media distribution system.

- Ultra high-definition 8x4 system switcher, scaler, mic mixer, audio DSP, amplifier, and control system
- Built-in AV Framework™ delivers a fully-functional system without any programming(5)
- Integrated 3-Series Control System® allows fully-programmable room control
- Provides matrix signal routing for up to 8 video sources and 4 displays
- Handles video resolutions up to 4K DCI and Ultra HD
- Includes HDMI®, DM 8G+, and balanced stereo analog audio inputs
- Also supports Dual-Mode DisplayPort, DVI, and HDBaseT™ sources(2)
- QuickSwitch HD™ technology manages HDCP keys for fast, reliable switching
- Auto-Locking® technology achieves rapid switching between disparate sources
- Performs automatic AV signal format management via EDID
- HDCP 2.2 compliant
- Provides adjustable input level compensation on each audio input
- Includes built-in 6-channel gated microphone mixing with DSP
- Provides two HDMI and two DM 8G+ (HDBaseT compatible) outputs
- DigitalMedia 8G+® connectivity enables long-distance wiring over CAT type twisted pair cable(3)
- HDBaseT Certified — Enables direct connection to other HDBaseT certified equipment
- Features an independent, high-performance 4K scaler at each HDMI output
- Upscales input signals to match the native resolution of any screen — including 4K and Ultra HD displays!
- Downsamples 4K, UHD, and ultra high-resolution computer signals to fit 1080p and other lower-resolution displays
- Handles any input resolution from standard NTSC 480i or PAL 576i, to UHD and 4K
- Provides intelligent frame rate conversion, content-adaptive noise reduction, and motion-adaptive de-interlacing
- Provides 3D to 2D signal conversion(3)
- Provides three balanced stereo audio outputs, each with independent mixer and DSP
- Provides two additional audio mixes, either of which is selectable at any digital output
- Features a built-in amplifier, selectable for 20W/Ch. @ 8Ω stereo or 40W @ 70/100 Volts mono
- Enables analog-to-HDMI audio embedding and de-embedding
- Enables USB signal routing via DM® transmitters and receivers or USB-EXT-DM extenders(7)
- Includes onboard IR, RS-232, relay, digital input, and Cresnet® control ports
- Supports Crestron® touch screens, keypads, and wireless remotes
- Supports XPanel with Smart Graphics™ computer and web based control
- Supports iPhone®, iPad®, and Android™ control apps
- Supports universal remotes via external RC-5 compatible IR receiver(4)
- Communicates natively with Crestron Fusion® Cloud
- Enables IT-friendly network integration via SNMP
- Integrated Ethernet switch provides a single-point LAN connection
- Control Subnet — provides a dedicated local network for Crestron devices
- Private Network Mode — requires just one IP address for the complete system
- Includes front panel controls for basic configuration, diagnostics, and signal routing
- Includes customizable front panel label strips and LCD display
- Allows advanced AV setup and adjustment via a web browser
- Features an internal universal power supply for worldwide compatibility
- Furnishes power to PoDM+ and HDBaseT PoE+ powered devices(6)
- 3-space 19-inch rack-mountable
4K Ultra HD
Crestron DigitalMedia™ continues to advance the standard for digital AV signal management, delivering the most complete end-to-end 4K system solutions available. The DMPS3-4K-300-C handles 4K/60 video with HDCP 2.2 encryption, ensuring support for all the latest 4K and Ultra HD displays and media sources. Support for 4K is also essential to support the latest generation of computers and monitors with native resolutions beyond 1080p and WUXGA.

No Programming Required!
Installing the DMPS3-4K-300-C is easy, fast, and affordable. Built-in .AV Framework™ technology delivers a fully-functional presentation system with simplified configuration and a choice of control options and other add-ons. For complete details on the capabilities supported by .AV Framework, please visit: www.crestron.com/avframework.

4K System Switcher
The DMPS3-4K-300-C provides high-performance routing of HDMI® and other AV sources to up to four separate displays, projectors, codecs, and other devices. Its video inputs include six HDMI and two DM 8G+. The HDMI inputs are compatible with DVI and Dual-Mode DisplayPort sources, and the DM 8G+ inputs are compatible with HDBaseT. Five balanced analog audio inputs are also included. Each HDMI and analog audio input includes adjustable input compensation to accommodate a range of signals and maintain consistent volume levels when switching between sources.

Built-in 8x4 video matrix switching allows up to four different video sources to be routed simultaneously to four different display devices. Video outputs are comprised of two HDMI and two DM 8G+. The HDMI outputs are compatible with DVI [2] and the DM 8G+ outputs are compatible with HDBaseT.

The audio signal from any input can be freely routed to any of three separate stereo analog audio outputs. Audio can also be routed to the digital outputs via two independently switchable signal paths, either of which may be selected to feed any HDMI or DM 8G+ output.

4K/60 Video Scaling
An independent, high-performance 4K scaler is included on each HDMI output to ensure an optimal image on each display no matter what sources are selected. Each scaler allows all types of video and computer sources to be viewed reliably and look their best on any display up to 4K.

Input resolutions from standard definition NTSC 480i to ultra high-definition 4K DCI are scaled beautifully to any output resolution up to 4K DCI (4096 x 2160 @ 60 Hz). Interlaced sources are converted to progressive scan using motion-adaptive deinterlacing. Intelligent frame rate conversion enables support for 24p and PAL format sources. And, 3D to 2D conversion allows 3D content to be viewed on 2D-only displays. Fully automatic operation eliminates any complicated setup by utilizing the displays’ EDID to configure each scaler.

Scaling can be added to either DM 8G+ output using the DM-RMC-4K-SCALER-C receiver, which features its own built-in 4K scaler. This method of employing an independent scaler for each display device delivers the most versatile and reliable solution for handling a wide array of input sources and routing them to multiple disparate display devices.

DigitalMedia 8G+
Its DM 8G+ inputs and outputs endow the DMPS3-4K-300-C with incredible potential for connecting remote sources and display devices, and integrating with larger systems. DM 8G+ provides a true one-wire interface for transporting ultra high-definition video, audio, control, power, and networking signals over CAT type cable at distances up to 330 feet (100 meters). Connecting a DM 8G+ receiver to either DM 8G+ output provides a streamlined AV and control interface for a projector or flat panel display located anywhere in the room. Connecting up to two DM 8G+ transmitters provides expanded input connectivity to incorporate remote AV sources and mobile devices at a conference table, lectern, credenza, wall plate, or some other location. DM 8G+ can also provide the interface to a centralized DigitalMedia matrix switcher to enable the distribution of signals between multiple rooms and buildings.
HDBaseT® Certified

Crestron DM 8G+ technology is designed using HDBaseT Alliance specifications, ensuring interoperability with other HDBaseT certified products. Via DM 8G+, the DMPS3-4K-300-C can be connected directly to an HDBaseT compliant source or display device without requiring a DM® transmitter or receiver.

6-Channel Microphone Mixer

The DMPS3-4K-300-C includes built-in mixing and processing for six microphones. Each mic input provides 60 dB of gain adjustment, switchable 48V phantom power, fully-adjustable gating, compression, delay, and 4-band semi-parametric EQ. Sophisticated mixing allows for a completely different stereo mix of all six microphones at each of the DMPS3-4K-300-C’s three analog audio outputs. Two additional mixes can be configured and selected to feed any of the HDMI or DM 8G+ outputs.

Professional Audio DSP

Each analog audio output on the DMPS3-4K-300-C includes its own digital signal processor, allowing each output to be optimized to feed a power amplifier, codec, recorder, or assistive listening system. In addition to real-time adjustable volume, bass, treble, and mute controls, each DSP provides 10-band graphic equalization, 4-band parametric equalization, fully-adjustable limiting, and up to 85 ms of speaker delay adjustment.

Built-in Power Amplifier

Its built-in power amplifier allows the DMPS3-4K-300-C to directly drive a pair of stereo speakers (20 Watts per channel @ 8Ω), or a group of distributed ceiling speakers (40 Watts mono @ 70 or 100 Volts). Fed by the main “Program” output, the internal amplifier benefits fully from the onboard DSP. For larger applications, Crestron AMP-Series power amplifiers may be added to provide a complete solution for driving separate program and speech speakers, or any multi-zone speaker system.

Audio Embedding & De-Embedding

The inclusion of professionally balanced analog audio inputs and outputs, combined with the ability to route audio signals independent of video, affords extensive flexibility for many specialized applications — without the need for any extra equipment! For instance, its balanced inputs allow the DMPS3-4K-300-C to interface directly with an audio mixing console, allowing the live sound mix to be embedded with the video signal from a digital camera and combined into a single HDMI output signal. Or, any of its balanced outputs may be used to de-embed audio from a digital AV source to feed the mixing console. An “Aux” output may even be re-routed back through an analog input to allow its built-in DSP, or an external DSP, to be used to process the audio signal feeding the HDMI and DM 8G+ outputs.

EDID Format Management

The DMPS3-4K-300-C allows for management of the EDID (Extended Display Identification Data) information that passes between the display devices, scalers, and input sources in the system. From the web browser setup screen, the format and resolution capabilities of each device can be assessed, allowing the installer to configure EDID signals appropriately for the most desirable and predictable behavior.

QuickSwitch HD™ Technology

Handling digital media signals means handling HDCP (High-bandwidth Digital Content Protection), the encryption scheme used by content providers to protect their DVDs, Blu-ray™ discs, and broadcast signals against unauthorized copying. Viewing HDCP encrypted content requires a source device to “authenticate” each display and signal processor in the system and issue it a “key” before delivering an output signal. Crestron QuickSwitch HD manages these keys to ensure fast, reliable switching and immunity to “blackouts” for every source and display device connected to the system.

Auto-Locking® Technology

Crestron Auto-Locking Technology enables super-fast signal switching by instantaneously configuring every device in the signal path, including DM transmitters, DM receivers, and scalers, as soon as the signal hits the first device. Whether switching between sources or changing TV channels, Auto-Locking significantly reduces the time it takes each device to sense the new signal and configure itself to handle the changes, virtually eliminating any noticeable gap while switching.

USB Signal Routing

Along with video and audio, the DMPS3-4K-300-C can also provide for the routing of USB HID (Human Interface Device) signals, allowing a USB HID compliant keyboard and/or mouse at one location to control a computer or media server at another location. USB HID connectivity is provided through select DM receivers and transmitters. Crestron also offers USB over Ethernet Extenders (USB-EXT-DM®), which may be used to enable the routing of multiple USB devices of virtually any type, all seamlessly managed through the DMPS3-4K-300-C®.

Integrated 3-Series Control System®

Its built-in 3-Series control system enables the DMPS3-4K-300-C to provide complete, customizable control of every AV device, as well as room lighting, window shades, and projection screens, without requiring a separate control processor. Onboard control ports include four IR ports, two RS-232 COM ports, four relay ports, and four digital input ports, as well as Cresnet® and Ethernet. The DMPS3-4K-300-C supports the full line of Crestron touch screens, keypads, and wireless remotes for a user experience custom tailored to the specific requirements of each end-user. Support for Crestron control apps and Crestron Fusion® Cloud delivers the industry’s most powerful platform for remotely controlling, monitoring, and managing multiple rooms using computers and mobile devices.

CEC Embedded Device Control

For controlling third-party AV devices, the DMPS3-4K-300-C provides an alternative to conventional IR, RS-232, and Ethernet by harnessing the CEC (Consumer Electronics Control) signal embedded in HDMI. Using CEC, many devices can be controlled right through their HDMI or HDBaseT connections, eliminating the need for any dedicated serial cables or IR emitters.

Built-in Ethernet Switch

In addition to transporting digital video and audio, the DM 8G+ ports on the DMPS3-4K-300-C can also extend Ethernet out to the display and source devices (via select DM transmitters and receivers), providing high-speed connectivity for each room device that requires a LAN connection.
is also utilized internally by the Crestron control bus to manage each transmitter and receiver and provide device control.

**Dedicated Control Subnet**

The Crestron Control Subnet is a Gigabit Ethernet network dedicated to Crestron devices. Via the DMPS3-4K-300-C’s Control Subnet port, an installer may simply connect a single touch screen or wireless gateway, or add a Crestron PoE switch (CEN-SW-POE-5 or CEN-SWPOE-16) to handle multiple touch screens, gateways, and other devices. PoE can be enabled at the Control Subnet port to power a single touch screen or other PoE powered device. Auto-configuration of the entire subnet is performed by the DMPS3-4K-300-C, discovering each device and assigning IP addresses without any extra effort from the installer.

**Private Network Mode**

To streamline its implementation on a Corporate or university LAN, the DMPS3-4K-300-C employs Private Network Mode. Using Private Network Mode, the DMPS3-4K-300-C requires just one IP address for the complete room system including all connected DM receivers and transmitters.

**Easy Setup**

Every step of the DMPS3-4K-300-C setup process is designed to be quick and easy. Out of the box, the front panel supports basic signal routing for easy testing and troubleshooting during installation. Simplified system configuration is enabled using AV Framework, which is easily configurable via a computer web browser. Advanced configuration and adjustment is enabled through the front panel or a web browser. The front panel label strips can be customized using Crestron Engraver software or standard 3/8” tape labels, allowing for the clear designation of each input and output. Inputs and outputs may also be designated by name to appear on the LCD display when selected.

**Crestron Connect It™**

Crestron Connect It is a cost-effective, simple-to-use presentation solution that works seamlessly with the DMPS3-4K-300-C. Simply add one or more Crestron Connect It Cable Caddies (TT-100 series) to provide BYOD connectivity and one-touch control for multiple participants around a conference table. Power and communications for each cable caddy are provided via Cresnet, or via the USB port on a Crestron Connect It compatible DM transmitter.

**SPECIFICATIONS**

**Operating System**

Crestron 3-Series; real-time, preemptive, multi-threaded/multitasking kernel; Transaction-Safe Extended FAT file system; supports up to 10 simultaneously running programs; preloaded DMPS3 AV Framework Base Program

**Memory**

SDRAM: 512 MB
Flash: 4 GB

**Communications**

**Ethernet:** 10/100/1000 Mbps, auto-switching, auto-negotiating, auto-discovery, full/half duplex, industry-standard TCP/IP stack, UDP/IP, CIP, DHCP, SSL, TLS, SSH, SFTP (SSH File Transfer Protocol), FIPS 140-2 compliant encryption, IEEE 802.1X, SNMP, BACnet™/IP [86], IPv4 or IPv6, Active Directory authentication, IIS v.6.0 Web Server, SMTP e-mail client, RSTP, Private Network Mode

**Control Subnet:** 10/100/1000 Mbps Ethernet, auto-switching, auto-negotiating, auto-discovery, full/half duplex, DHCP server, DNS Server, port forwarding, Isolation Mode, IEEE 802.3at Type 1 compliant PoE PSE

Cresnet: Cresnet master mode

**USB:** USB signal routing via select DM transmitters and receivers, or via USB-EXT-DM extenders[9]; USB device port for computer console (setup)

**RS-232:** 2-way device control and monitoring up to 115.2k baud with hardware and software handshaking

**IR/Serial:** 1-way device control via infrared up to 1.2 MHz or serial TTL/RS-232 (0-5 Volts) up to 115.2k baud; supports CNXRMIRD IR Receiver[4]

**DigitalMedia:** DM 8G+, HDCP 2.2, EDID, CEC, PoDM+ [10], Ethernet

**HDBaseT:** HDCP 2.2, EDID, CEC, RS-232, PoE+. [9], Ethernet

**HDMI**: HDCP 2.2, EDID, CEC

*NOTE: Supports management of HDCP and EDID; supports management of CEC between the connected HDMI and HDBaseT devices and the control system*

**Video**

**Switcher:** 8x4 matrix, Crestron QuickSwitch HD technology

**Scalers (HDMI outputs):** (2) 4K video scalers with motion-adaptive deinterlacing, intelligent frame rate conversion, Deep Color support, 3D to 2D conversion [8], content-adaptive noise reduction, and widescreen format selection (zoom, stretch, maintain aspect-ratio, or 1:1)

**Input Signal Types:** HDMI w/Deep Color, 3D [8], & 4K (DVI & Dual-Mode DisplayPort compatible [8]); DM 8G+ & HDBaseT w/Deep Color, 3D [8], & 4K

**Output Signal Types:** HDMI w/Deep Color & 4K (DVI compatible [8]; DM 8G+ & HDBaseT w/Deep Color, 3D, & 4K

**Maximum Resolutions:**

**Audio – General**

Switcher/Mixer: 13x5 stereo source matrix switcher, digital & analog source inputs, 6-channel gated mic mixer w/DSP, independent mixer per analog output (6-ch mic + 1 stereo source), independent stereo DSP per analog output, integrated power amplifier, two independent digital output mixers (6-ch mic + 1 stereo source), 2x1 digital output mix selector per digital output

Analog-To-Digital Conversion: 24-bit 48 kHz

Digital-To-Analog Conversion: 24-bit 48 kHz

Frequency Response, Digital & Analog Line Outputs:
- 20 Hz to 20 kHz ±0.5 dB (digital source);
- 20 Hz to 20 kHz ±0.5 dB (analog line source);
- 20 Hz to 20 kHz ±0.7 dB (microphone source)

Frequency Response, Speaker Output:
- 20 Hz to 20 kHz ±1 dB @ 20 Watts into 8 Ohms;
- 100 Hz to 20 kHz ±2.5 dB @ 70 or 100 Volts

S/N Ratio, Digital & Analog Line Outputs:
- >108 dB, 1 kHz, A-weighted (digital source);
- >103 dB, 1 kHz, A-weighted (analog line source)

S/N Ratio, Speaker Output:
- 98 dB @ 20 Watts into 8 Ohms, 1 kHz, A-weighted;
- 96 dB @ 20 Watts into 4 Ohms, 1 kHz, A-weighted

THD+N, Digital & Analog Line Outputs:
- <0.002%, 20 Hz to 20 kHz (digital source);
- <0.005%, 20 Hz to 20 kHz (analog line source);
- <0.05%, 20 Hz to 20 kHz (microphone source)

THD+N, Speaker Output:
- <0.1%, 1 kHz @ 20 Watts into 4 or 8 Ohms;
- <0.7%, 20 Hz to 20 kHz @ 20 Watts into 4 or 8 Ohms

Stereo Separation, Digital & Analog Line Outputs:
- >108 dB (digital source);
- >103 dB (analog source)

Stereo Separation, Speaker Output:
- >65 dB @ 20 Watts, 1 kHz

Channel Separation, Digital Outputs:
- >108 dB (digital source);
- >103 dB (analog source)

Channel Separation, Analog Line Outputs:
- >103 dB

Speaker Output Modes: 4Ω/8Ω stereo, 70V mono, or 100V mono

Speaker Amplifier Output Power:
- 20 Watts RMS per channel @ 8 Ohms, 4 Ohms tolerant
- 40 Watts RMS @ 70 or 100 Volts

**Audio – Source Inputs**

Input Signal Types: HDMI (Dual-Mode DisplayPort compatible) on Inputs 1-6, DM 8G+ & HDBaseT on Inputs 7 & 8, analog 2-channel on Aud In 1-5

Analog Formats: Stereo 2-channel

Digital Formats: 2-channel LPCM

Input Compensation: ±10.0 dB, adjustable per input

**Audio – Analog Line & Speaker Outputs**

Typical of 1 analog line/speaker output (Program Out & Speaker Output) and 2 analog line outputs (Aux Out 1 – 2):

Output Signal Type/Format: Stereo 2-channel

Mic 1 – 6:
- -80 to +10 dB Level adjustment range, plus Mute and Pan

Mics Master:
- -80 to +10 dB Level adjustment range, plus Mute

Source:
- -80 to +10 dB Level adjustment range, plus Mute and Balance

Master Volume:
- -80 to +10 dB Level adjustment range, plus Mute and Mono

Mixer Presets: 1 through 5

Bass: ±12.0 dB

Treble: ±12.0 dB

Equalization:
- 10-band graphic + 4-band parametric

GEQ Center Frequencies: 31.5, 63, 125, 250, 500, 1k, 2k, 4k, 8k, 16k Hz

GEQ Gain: ±12.0 dB per band

PEQ Center Frequencies: 10 to 22000 Hz per band

PEQ Gain: -36.0 to +24.0 dB per band

PEQ Bandwidth: 0.02 to 3.50 octaves per band

PEQ Types: Peaking EQ, High Pass, Low Pass, High Shelf, Low Shelf, Notch

Delay: 0.0 to 85.0 ms

Limiter Threshold: -80 to 0 dB

Limiter Ratio: 1:1 to 10:1

Limiter Attack: 1 to 250 ms

Limiter Hold: 1 to 200 ms

Limiter Release: 1 to 1000 ms

Limiter Curve: Hard or soft knee

EQ Presets: 1 through 10 (includes Delay and Limiter settings)

**Audio – Digital Outputs**

Typical of 4 digital outputs (HDMI Output 1 – 2 & DM Output 3 – 4):

Output Signal Types:
- HDMI (DVI compatible) on Outputs 1 & 2, DM 8G+ & HDBaseT on Outputs 3 & 4

EQ Gain: ±12.0 dB per band

High-Pass Filter: On or Off

Gating Threshold: -80 to 0 dB

Gating Depth (Attenuation): -80 to 0 dB

Gating Attack: 1 to 250 ms

Gating Release: 1 to 1000 ms

Compression Threshold: -80 to 0 dB

Compression Ratio: 1:1 to 10:1

Compression Attack: 1 to 250 ms

Compression Release: 1 to 1000 ms

Compression Curve: Hard or soft knee
Formats: 2-channel LPCM

Digital Output Mix Select 1 – 2: Selects which mix is routed to the corresponding output

Typical of 2 digital output mixers:
- Mic 1 – 6: -80 to +10 dB Level adjustment range, plus Mute and Pan
- Mics Master: -80 to +10 dB Level adjustment range, plus Mute
- Source: -80 to +10 dB Level adjustment range, plus Mute and Balance
- Master Volume: -80 to +10 dB Level adjustment range, plus Mute
- Mixer Presets: 1 through 5

Connectors – Audio/Video Inputs

AUD IN 1 – 5: (5) 5-pin 3.5 mm detachable terminal blocks;
Balanced/unbalanced stereo line-level analog audio inputs;
Input Impedance: 24k Ohms balanced/unbalanced;
Maximum Input Level: 4 Vrms balanced, 2 Vrms unbalanced

MC1/LN1 – MC6/LN6: (6) 5-pin 3.5 mm detachable terminal blocks;
Comprises (6) balanced microphone/line audio inputs;
Balanced Mic Input Level: -60 to 0 dBV, 1 Vrms maximum;
Balanced Line Input Level: -31 to +11 dBV, 3.7 Vrms maximum;
Unbalanced Line Input Level: -37 to +5 dBV, 1.85 Vrms maximum;
Mic Input Impedance: 3.9k Ohms balanced;
Line Input Impedance: 19k Ohms balanced, 9.5k Ohms unbalanced;
Phantom Power: 48 Volts DC, software enabled/disabled per channel

HDMI 1 – 6 INPUTS: (6) 19-pin Type A HDMI female;
Digital video/audio inputs;
(DVI compatible)

DM OUTPUT 3 – 4: (2) 8-pin RJ45 female, shielded;
DM 8G+ outputs, HDBaseT compliant;

Connectors – Audio/Video Outputs

AUX OUT 1 – 2: (2) 5-pin 3.5 mm detachable terminal blocks;
Balanced/unbalanced stereo line-level audio outputs;
Output Impedance: 200 Ohms balanced, 100 Ohms unbalanced;
Maximum Output Level: 4 Vrms balanced, 2 Vrms unbalanced

HDMI 1 – 2 OUTPUTS: (2) 19-pin Type A HDMI female;
Digital video/audio outputs;

Connectors - Control & Power

IR - SERIAL OUT 1 – 4: (4) 2-pin 3.5 mm detachable terminal blocks;
IR/Serial output ports;
IR output up to 1.2 MHz;
1-way serial TTL/RS-232 (0-5 Volts) up to 115.2k baud

IR IN: (1) 3-pin 3.5 mm detachable terminal block
For connection of the CNXRMIID IR Receiver;
Allows control from IR wireless remotes using RC-5 command set

INPUT 1 – 4: (1) 5-pin 3.5 mm detachable terminal block;
Comprises (4) programmable digital inputs;
Input Voltage Range: 0 to 24 Volts DC, referenced to GND;
Logic Threshold: 2.5 Volts DC nominal with 1 Volt hysteresis band;
Input Impedance: 10k Ohms at >5 Volts, 1M Ohms at <5 Volts;
Pull-up Resistor: 2.2k Ohms per input

RELAY 1 – 4: (1) 8-pin RJ45 female, shielded;
Comprises (4) normally open, isolated relays;
Rated 1 Amp, 30 Volts AC/DC;
MOV arc suppression across contacts

NET: (4) 4-pin 3.5 mm detachable terminal block;
Cresnet Master ports, paralleled;
Available Cresnet Power: 30 Watts

PoDM+ INPUT PWR: (1) Combo D-Sub 7w2, male;
48 Volt DC power input for PoDM power supply;
Enables PoDM+ power sourcing on each DM INPUT/OUTPUT port;
Enables PoE power sourcing on the CONTROL SUBNET port

SERVICE: (1) USB Type B female;
For factory use only

100-240V~4.0A 50/60Hz: (1) IEC 60320 C14 main power inlet;
Mates with removable power cord, included

G: (1) 6-32 screw;
Chassis ground lug
CONTROL SUBNET: (1) 8-pin RJ45, female; 10Base-T/100Base-TX/1000Base-T Ethernet port; PoE PSE (Power Sourcing Equipment) port; Provides a dedicated local network for Crestron devices
LAN: (1) 8-pin RJ45 female; 10Base-T/100Base-TX/1000Base-T Ethernet port

COMPUTER (front): (1) USB Type B female; USB computer console port (for setup only)

Controls & Indicators

PWR: (1) Green LED, indicates operating power supplied from AC power line
NET: (1) Yellow LED, indicates Cresnet bus activity
LAN: (1) Yellow LED, indicates Ethernet activity
HW-R: (1) Recessed pushbutton for hardware reset, reboots the control system
SW-R: (1) Recessed pushbutton for software reset, restarts the software program

LCD Display: (1) Green LCD alphanumeric, adjustable backlight, 2 lines x 20 characters per line, displays input/outputs by name, volume levels, setup menus, signal routing, device info, and other system information
SOFTKEYS: (4) Pushbuttons for activation of LCD driven functions and passcode entry

MENU: (1) Pushbutton, steps the menu back one level
▲, ▼: (2) Pushbuttons, for scrolling up or down through the menu and adjusting menu parameters
ENTER: (1) Pushbutton, executes the highlighted menu or value

VOLUME: (1) Continuous turn rotary encoder, adjusts menu parameters, defaults to Program audio volume

MUTE: (1) Pushbutton and red LED, mutes the Program audio output

INFO: (1) Pushbutton and red LED, selects INFO mode to view AV and device info

ROUTE: (1) Pushbutton and red LED, selects ROUTE mode to allow routing changes

VIEW: (1) Pushbutton and red LED, selects VIEW mode to view current routing

INPUT 1 – 8: (8) Pushbuttons and red LEDs, each selects the corresponding video input for routing

OUTPUT 1 – 4, PROG, AUX 1 – 2: (7) Pushbuttons and red LEDs, each selects the corresponding video or audio output for routing

SPEAKER OUTPUT (rear): (1) 3-position slide switch, selects the amplifier output configuration

DM INPUT 7 – 8 (rear): (4) LEDs, green LEDs indicate DM link status, amber LEDs indicate video and HDCP signal presence, for each corresponding port

DM OUTPUT 3 – 4 (rear): (4) LEDs, green LEDs indicate DM link status, amber LEDs indicate video and HDCP signal presence, for each corresponding port

CONTROL SUBNET (rear): (2) LEDs, (1) green and (1) amber, for indication of Ethernet speed, activity, and link status
LAN (rear): (2) LEDs, (1) green and (1) amber, for indication of Ethernet speed, activity, and link status

Power

Main Power: 4 Amps @ 100-240 Volts AC, 50/60 Hz
Power Consumption: 82 Watts typical, 61 Watts idle
Available Cresnet Power: 30 Watts
Power over DM (PoDM): IEEE 802.3at compliant PoDM+ PSE (Power Sourcing Equipment), each DM INPUT/OUTPUT port supplies up to 30 Watts to power one PoDM (Class 0-3) or PoDM+ (Class 4) PD (Powered Device)
Power over HDBaseT: IEEE 802.3at PoE+ compliant PSE (Power Sourcing Equipment), each DM INPUT/OUTPUT port supplies up to 30 Watts to power one HDBaseT PoE or PoE+ PD (Powered Device)
Power over Ethernet (PoE): IEEE 802.3at compliant PoE PSE (Power Sourcing Equipment), the CONTROL SUBNET port supplies up to 15.4 Watts to power one PoE (Class 0-3) PD (Powered Device)

PoDM Power Supply: Compatible with model PW-4830DUS or DM-PSU-3X8-RPS

Environmental

Temperature: 41° to 104° F (5° to 40° C)
Humidity: 10% to 90% RH (non-condensing)
Heat Dissipation: 280 BTU/hr typical, 208 BTU/hr idle

Enclosure

Chassis: Metal, black finish, fan-cooled, vented sides
Front Panel: Metal, black finish with polycarbonate label overlay
Mounting: Freestanding or 3 RU 19-inch rack-mountable (adhesive feet and rack ears included)

Dimensions

Height: 5.20 in (133 mm) without feet
Width: 17.28 in (439 mm);
19.00 in (483 mm) with rack ears
Depth: 15.75 in (400 mm)

Weight

15.5 lb (7.1 kg)

Maximum DM 8G+ Cable Lengths

### MODELS & ACCESSORIES

#### Available Models
- **DMPS3-4K-300-C**: 3-Series® 4K DigitalMedia™ Presentation System 300

#### Available Accessories
- TSW-760: 7" Touch Screen
- TSW-1060: 10" Touch Screen
- MP-B10: Media Presentation Button Panel B10
- TT-100 Series: Crestron Connect It™ Cable Caddy
- AM-101: AirMedia® Presentation Gateway
- PW-4830DUS: 150W PoDM Power Pack
- DM-PSU-3X8-RPS: PoDM+ Redundant Power Supply
- DM-RMC-4K-100-C-1G: Wall Plate 4K DigitalMedia 8G+® Receiver & Room Controller 100
- DM-RMC-4K-100-C: 4K DigitalMedia 8G+® Receiver & Room Controller 100
- DM-RMC-4K-SCALER-C: 4K DigitalMedia 8G+® Receiver & Room Controller w/Scaler
- DM-RMC-4K-SCALER-C-DSP: 4K DigitalMedia 8G+® Receiver & Room Controller w/Scaler & Downmixing
- DM-RMC-200-C: DigitalMedia 8G+® Receiver & Room Controller 200
- DM-RMC-SCALER-C: DigitalMedia 8G+® Receiver & Room Controller w/Scaler
- DM-TX-4K-100-C-1G: Wall Plate 4K DigitalMedia 8G+® Transmitter 100
- DM-TX-200-C-2G: Wall Plate DigitalMedia 8G+® Transmitter 200
- DM-TX-200-2C-2C: 4K DigitalMedia 8G+® Transmitter 202
- DM-TX-4K-302-C: 4K DigitalMedia 8G+® Transmitter 302
- DM-TX-201-C: DigitalMedia 8G+® Transmitter 201
- DM-TX-401-C: DigitalMedia 8G+® Transmitter 401
- USB-EXT-DM: USB over Ethernet Extender with Routing
- AMP Series: Commercial Power Amplifiers
- GLS-OFT-C-CN: Dual-Technology Occupancy Sensor with Cresnet®
- GLS-OIR-C-CN: Passive Infrared Occupancy Sensor with Cresnet®
- Crestron Fusion® Cloud: Enterprise Management Service
- Crestron® App: Control App for Apple® iOS® & Android™
- XPan®: Crestron Control® for Computers
- 3-Series® BACnet™/IP Support: 3-Series Native BACnet/IP Interface License
- CSP-LIR-USB: IR Learner
- CNSP-XK: Custom Serial Interface Cable
- IRP2: IR Emitter
- CNXRIMRD: IR Receiver
- DM-CONN-ULTRA-RECP: DigitalMedia™ Ultra Keystone RJ45 Jack
- DM-CBL-ULTRA-PC: DigitalMedia™ Ultra Patch Cables
- DM-CBL-ULTRA: DigitalMedia™ Ultra Cable
- DM-CONN: Connector for DM-CBL-ULTRA
- DM-CBL-8G: 8G DigitalMedia 8G+® Cable
- DM-8G-CONN: Connector for DM-CBL-8G
- DM-8G-CONMP: Crimping Tool for DM-8G-CONN-WG
- DM-8G-CONMP-WG: Crimping Tool for DM-8G-CONN-WG

#### CBL Series:
- Crestron® Certified Interface Cables
- MP-WP Series: Media Presentation Wall Plates
- MPI-WP Series: Media Presentation Wall Plates - International Version

**Notes:**
1. Some features and functions described in this spec sheet may not be supported using AV Framework. For a complete list of capabilities and options supported by AV Framework, please visit: www.crestron.com/avframework.
2. HDMI connections require an appropriate adapter or interface cable to accommodate a DVI or Dual-Mode DisplayPort signal. CBL-HD-DVI interface cables are available separately.
3. The HDMI outputs do not pass 3D signals. On these outputs, 3D signals are automatically converted to 2D, then scaled and output as 2D. 3D signals can be passed through the DM 8G+ outputs.
4. Item(s) sold separately.
5. The maximum cable length for DigitalMedia 8G+ (DM 8G+) or HDBaseT is dependent upon the type of cable and resolution of the video signal. Refer to the “Maximum DM 8G+ Cable Lengths” table for a detailed overview. Crestron legacy cable models DM-CBL DigitalMedia Cable and DM-CBL-D DigitalMedia D Cable support the same resolutions and cable lengths as CAT5e. Shielded cable and connectors are recommended to safeguard against unpredictable environmental electrical noise which may impact performance at resolutions above 1080p. Refer to the Crestron DigitalMedia Design Guide, Doc. #4546 for complete system design guidelines. DM 8G+ is compatible with HDBaseT Alliance specifications for connecting to HDBaseT compliant equipment. All wire and cables are sold separately.
6. Enabling PoDM and PoE power sourcing requires an external power supply, model PW-4830DUS or DM-PSU-3X8-RPS, sold separately. Due to the inherent power loss that occurs over CATx cable, a maximum of 25.5 Watts is delivered at each PoDM+ or HDBaseT PoE+ powered device. Be aware that the CONTROLLER SUBNET port is limited to regular PoE (Class 0-3), which delivers a maximum of 12.95 Watts to the powered device. Any wiring that is connected to a PoDM or PoE PSE port is for intra-building use only and should not be connected to a line that runs outside of the building in which the PSE is located.
7. Manages the routing of USB HID signals between peripheral DM devices that are equipped with USB HID ports. The USB ports onboard the DMPS3-4K-300-C are not usable for USB signal routing. Also programmable to manage the routing of USB signals between Crestron USB over Ethernet Extender modules (USB-EXT-DM), sold separately. Refer to the USB-EXT-DM spec sheet for more information.
8. License required. The DMPS3-4K-300-C supports a maximum of 500 BACnet objects when dedicated for BACnet use only. Actual capabilities are contingent upon the overall program size and complexity.

This product may be purchased from an authorized Crestron dealer. To find a dealer, please contact the Crestron sales representative for your area. A list of sales representatives is available online at www.crestron.com/salesreps or by calling 800-237-2041.
