

POP BLOCKER W/ REPLACEMENT LINERS

ASVSR6GB | 12822

6" Pop Blocker tilts 180° off the gooseneck. Micro-weave nylon diffuser suppresses P's, B's, and breath noises and protects microphones from moisture.

Flexible 12" gooseneck for easy and quiet positioning.

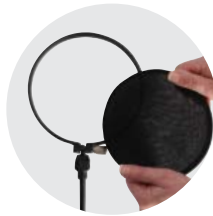

Durable V-Bar clamp secures to shaft up to 7/8".

To replace the liner, retrieve the other included liner, or ask about our ASVS6R3 pack of three replacement liners!

Twist knob counter-clockwise to loosen the plastic hoop.

Push out old filter and discard. Push in the replacement filter and twist the knob clockwise to secure and tighten.

FEATURES AND BENEFITS

Prevent annoying vocal thrusts, breath sounds, and plosives with this adjustable 6" diameter Pop Blocker. The specially designed micro-weave nylon filter diffuses the thrust of the voice, without altering its natural sound. The surface is also unprinted for consistent filtering. The 12" flexible gooseneck allows for precise positioning of the Pop Blocker between you and your mic. Durable V-Bar Clamp secures to shafts up to 7/8" in diameter. The ASVSR6GB works with easily replaceable filters that help stop the spread of germs (ask about our ASVS6R3 Replacement Filter Pack). Two 6" diameter replaceable filters are included.

Ask about our ASVS6R3 Replacement Liners for ASVSR6GB. Liners are easy to change out for multiple users to prevent spreading germs. Pack includes three liners.
