# PWB-200 Series Plasma/Flat Panel Display Wall Box

## DESCRIPTION

The PWB-200 series balance quality and cost, bringing fully featured wall boxes to you at an affordable price. We have kept the cost low while delivering the quality and ease of installation you have always experienced with FSR products. All models are ready to install and include a two part cover with mounting screws in either black or white, back box, screws for wood or steel stud mounting, grounding screws, tie wraps, and a rubber grommet. One of the single gang knockouts has a 1"x2" oblong internal knockout and can be used with the supplied grommet.

There are four models designed to fit the individual application requirements:

The **PWB-200** is approximately 7"x7"x4" with two single gang knockouts, and one IPS knockout to mount up to six single IPS plates. The unit is designed to fit 2"x4" stud walls.

The largest and highest capacity model is the **PWB-250**. This unit is approximately 14.25"x7"x4" and has three single gang knockouts and one IPS knockout to mount up to six single IPS plates. In addition, a removable passthrough enclosure provides an additional single gang knockout and can be used to isolate cables that the installer may need to pass through the backbox.

Specifically sized for installation in 2"x3" stud walls, the **PWB-203** and **PWB-253** are 3" deep versions of the PWB-200 and PWB-250 respectively. One steel duplex cover plate (PWB-203/253) and one steel Decora cover plate (PWB-253 only) is included for convenience and to ensure proper fit in the shallow back box.

## ACCESSORIES

The **PWB-2X0-AVBB** is an optional AV back box to enclose the exterior of the IPS knockout area (PWB-200 and PWB-250 only).

The **PWB-20X-MNT** is a set of bracket ears that allow the installer to position the PWB-200 or PWB-203 at different locations between the studs while mounting.

The **PWB-xxx-SLD** abandonment covers, are available in black or white. They are used in place of the finish covers to protect the units during construction or when they are used as closed utility boxes not requiring external cable access.

## FEATURES

- Rugged 16 gauge steel back box with 1/16" front cover
- Compatible with FSR's Intelligent Plate Solutions (IPS) inserts
- Can be installed in new or old work (mounting adapters included)
