

ETC ColorSource CYC

up·stage

/,əp'stāj/

adverb & adjective

1. at or toward the back of a theater stage.
“Hamlet turns to face upstage.”

verb

1. divert attention from; outshine.
“They were totally upstaged by their co-star in the film.”

ColorSource CYC

The ColorSource® CYC is a dedicated cyclorama fixture designed with the sole purpose of creating beautiful, smooth washes of light on a cyclorama or wall. And it delivers! This is the first ETC fixture to use this innovative five-color mix of red, green, blue, lime, and indigo for expanded range and color control.

No longer an afterthought...

The rich tones available with ColorSource CYC fixtures may be enough to make you change your lighting design ways. Don't be surprised if you find yourself basing your designs on the artistry of your back wall. The color of your skies will be better than "good enough." You'll never hear yourself saying, "Just put some color back there and call it done."

Your cyclorama will finally get the attention it deserves.

Compact design

The compact ColorSource CYC fixture practically blends in with the background. Never again will you have to lug around large, clunky, boxy fixtures or set up ground row after ground row or border after border. With its lightweight design, quickly setup the fixture on a stage floor, or hang it from a pipe without breaking your back.

Use less power, to get more power

Because these fixtures are fanless, and all-LED, they consume a fraction of the power of other standard cyc fixtures. And LED means no more gel! Your budget can go toward something other than replacing lamp after expensive lamp, and the saturated colored gel that burns through after a couple of shows.

Less power consumption doesn't mean less light output. In fact, you'll be able to light a full cyclorama with a fraction of the fixtures.

- All LED (RGBI-L)
- Rich bright light
- Power In and Thru via powerCON connectors
- DMX/RDM In and Thru via 5-pin XLR or RJ45 connectors
- Easy to use RGB control
- Fanless operation
- Stand-alone presets and sequences
- Optional one-channel operation mode via presets

Need help determining the number of fixtures you'll need for your venue, or the ideal spacing? Download the CYC Tool from iTunes® or Google Play™ and take the guesswork out of your CYC set up.
