

D-SPLIT

General Information

D-SPLIT is an optical isolator/splitter for DMX 512.

It allows the user more flexibility in connecting DMX-controlled devices. Instead of having to make them all fit within a single daisy chain, each of the four outputs from the D-SPLIT can be the start of its own chain, and multiple D-SPLITS can be linked together if needed.

Features

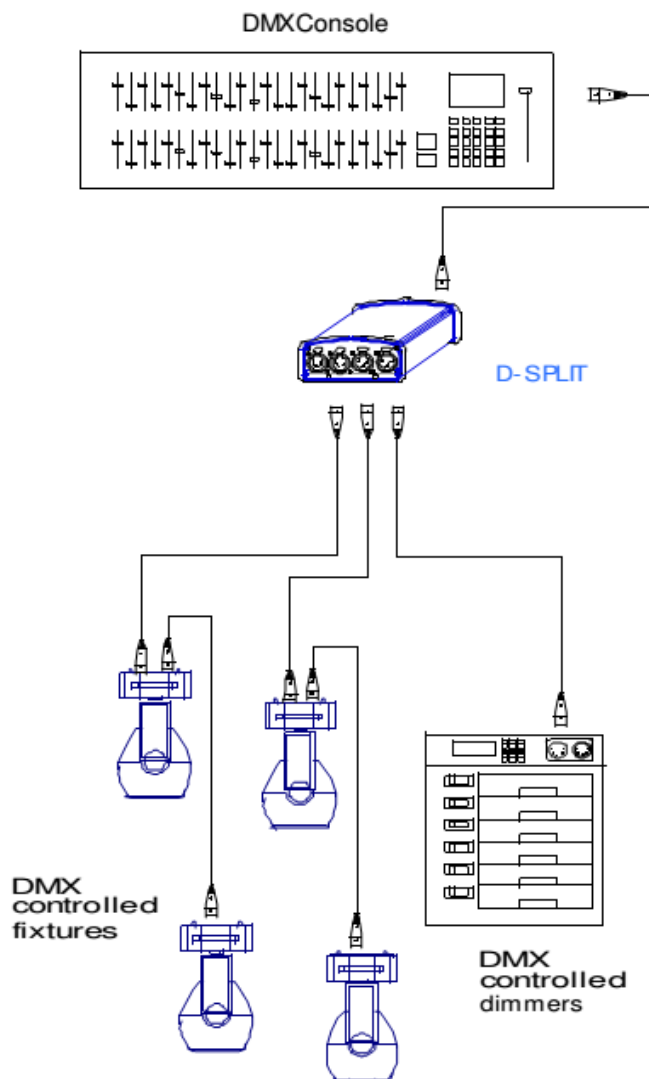

- Lightweight and portable
- 1 DMX input, 4 DMX outputs, all optically isolated (protects against up to 1000V of stray voltage)
- DMX512-1990 compatible
- Controls up to 512 channels
- LED indicators show Power and DMX output
- External 7.5V power supply (included)
- Provides two 5-PIN and two 3-PIN outputs for greater flexibility (70572)
- Provides all 5-PIN DMX outputs (70575)
- DMX Input is 5-PIN only on both models

Please note: D-Split does not support RDM
