Thank you for purchasing the MXL V900D Dynamic Microphone. With proper care, this microphone will give you years of satisfaction. For the best results, please take a few minutes to review this literature.

The MXL Team

General Characteristics

The V900D is a cardioid dynamic microphone. The cardioid design means it is most sensitive to sound at the front and there is a small lobe of sensitivity at the back of the microphone. It is designed as a live stage microphone, but like most dynamics, it can also be used in the studio. The V900D has a built-in shock mount, integrated windscreen, and a standard 3-pin male XLR connector. Please use a durable tripod or weighted base microphone stand to support the weight of this microphone.

Contents

Unpack your MXL V900D microphone carefully and verify that all of the following items are included:

- MXL V900D
- Cleaning cloth

If any of these items are missing or damaged, contact the company from which you purchased the microphone.

Microphone Cables

This microphone connects to a preamp or mixer via XLR cable. The microphone cable can have a profound effect on the sound of any microphone. Even the finest microphones will sound poor if the interconnect cable allows noise to enter or causes distortion and loss of information. Use only the best microphone cable your budget will allow. We highly recommend using Mogami® brand cable.

Care

Dust and foreign materials can degrade the performance of a microphone over time so always store the unit in a clean, moisture-free environment. Use a soft, dry cloth to clean the microphone as needed.

Specifications

Type	Dynamic
