

Full Moon Distortion Pedal

Material: Anodized Aluminum

Power Requirements: 9-Volt Battery or DC Negative AC Adaptor

Power Consumption: 90mA

Input Impedance: 500k ohm

Output Impedance: 10k ohm

Features:

- High-gain distortion effect pedal
- Onboard 3-Band EQ with a Low-Pass Filter; Texture and Bite switches
- Up to 12dB switchable Boost
- LED-backlit knobs; Fender Amp Jewel LED
- Magnetically latched hinged 9V battery door

Packed with brutal, high-gain tone and sound-shaping options galore, the Full Moon Distortion pedal has everything you need to unleash sonic mayhem. Both symmetrical and asymmetrical clipping modes are lurking under the Texture switch while the Bite switch shifts the upper-midrange and harmonics to bring out your pick attack, letting you cut and chug through the mix with ease.

The 3-Band EQ lets you dial in your sound to taste, while the flexible Hi-Treble control shapes your high end. The second footswitch kicks in up to +12dB of snarling post-gain Boost.

Designed by our in-house team of experts, the Full Moon Distortion is an all-original circuit. We consulted with a plethora of players while designing this pedal, and the resulting stompbox is packed with stage-ready features. The chassis is crafted from lightweight, durable anodized aluminum, and the Amp Jewel LED gives your pedalboard the classic Fender look. The LED-backlit knobs show your control settings on a dark stage at a glance. We even made swapping batteries quicker and easier with our exclusive "patent applied for," magnetically latched 9V battery door.

Growling with ultra-flexible sound, the Full Moon Distortion is everything you need to add barking, high-gain distortion to your arsenal.
