TC2290-DT

Legendary Dynamic Delay Plug-In with Dedicated Desktop Interface and Signature Presets

- Desktop controlled plug-in brings legendary TC2290 dynamic delay to your DAW
- Complete delay solution with extensive modulation capabilities for your favorite audio software
- High-quality tactile interface with authentic “look and feel” of celebrated TC2290 rack delay
- Custom-designed signature presets featuring world-class artists and recording engineers
- High-resolution input/output meters for accurate signal monitoring
- DAW tempo, automation and project recall support
- Award-winning TC ELECTRONIC algorithms for cutting-edge effects
- Powered by USB - ready for Mac* and PC
- Standard VST*, Audio Units* and AAX* plug-in processing, compatible with all major DAWs including Pro Tools*, Cubase*, Nuendo*, Logic Pro*, GarageBand* and Ableton Live*
- 3-Year Warranty Program*
- Designed and engineered in Denmark

TC2290-DT is a groundbreaking, versatile delay solution that features a dedicated hardware interface with full DAW integration and powerful signature presets that will fuel your inspiration and add instant character to your tracks.

Capable of conjuring up virtually any conceivable delay type, TC2290-DT makes it easy to vitalize your tracks with everything from crisp repeats, to complex delay rhythms and ultra-expressive modulated soundscapes.

TC2290-DT's sleek tactile controls and authentic tone recreations gives you total creative control of your delay, allowing you to explore and experiment to your heart's content. With its superior sound quality and extremely musical response, TC2290-DT is like adding another musical instrument to the mix!

Digital Delay Legacy

When the original 2290 Digital Delay hit the music world in 1985, it was lauded as a completely unmatched revolution in sound. Adopted by producers, FOH engineers and musicians alike, it redefined the benchmark for delay units, and quickly became a standard in studio and live rigs around the world.

While much has changed in the world of music, one thing remains true – the TC2290-DT is one of the best sounding digital delays you will ever hear!

Unbeatable Tone

TC2290-DT is capable of making the most pristine delays fused with amazing modulation effects, such as chorus and flanging. Endless sonic flexibility lets you add emotion and presence to your songs with crisp and organic repeats, or take your sound to the skies with beautifully rich stereo delays and modulated soundscapes.

Whether you're into rock 'n' roll, jazz, electronica or anything in-between, the incredibly versatile tonal palette of TC2290-DT will make your mixes pop like never before.

It's All In Your Hands

Now you can add the sound of this legendary delay processor to your DAW arsenal. TC2290-DT comes with a sleek and intuitive desktop control unit that lets you get your hands into the mix right out of the box.

With all tone-defining parameters at your finger tips, TC2290-DT takes up the song mantle of the classic 2290 Digital Delay, while radically reinventing the delay unit for a new generation of musicians, producers and engineers.

No Such Thing As Too Many Presets

Over the years, a veritable who's who of amazing bands, producers and artists including David Gilmour, Dream Theater, U2's The Edge and guitar virtuoso Robben Ford, have utilized the beautiful delays of the original 2290 - and many still do!

Imported directly from the actual rack units of artists from all corners of the music world, TC2290-DT's signature presets provide authentic recreations of the exact delays that helped define music history.

On top of the classic sounds, the signature presets feature an ever growing collection of all new designs by world-class artists and recording engineers. Tweaked down to the very last detail, the presets for TC2290-DT are record-ready settings that will skyrocket your mixing or recording session.

Make Your Music Come Alive

With traditional delay plug-ins, loud echoes often overpower and interfere with the subtle, organic nature of the music. TC2290-DT's dynamic delay responds instantly, and musically to the volume of the input signal – so the actual repeats change in response to your music.

While you're playing, the delay repeats blend seamlessly into the signal content, and when you stop the effect becomes more obvious. This is very similar to what is often referred to as ducking, which makes the desired signal much more prominent in the mix.

Metering & More

TC2290-DT provides high-resolution input and output meters for accurate signal monitoring directly on the hardware interface, plus all tone-defining parameters including delay time, feedback level, modulation, mix settings and much more.

Ready for Your DAW

TC2290-DT is an awesome addition to any console, mixing desk or bedroom recording station, and supports all modern plug-in standards.

This lets you make full use of DAW tempo, automation and full project recall, and gives you the freedom to work with any audio software you prefer, including: Pro Tools; Cubase; Nuendo; Ableton Live; Reaper; Logic Pro X, and many more.

Capturing All the Details

TC2290-DT perfectly recreates the unmistakable sound of the original 2290. Over the course of more than a year, our engineers have taken apart four original units, each with their own distinct character, and measured them from top to bottom.

In order to create the ultimate emulation, we then cross-compared the data step by step until we achieved the clarity and warmth that has always been the hallmark of the classic 2290 sound.

You Are Covered

We always strive to provide the best possible Customer Experience. Our products are made in our own MUSIC Tribe factory using state-of-the-art automation, enhanced production workflows and quality assurance labs with the most sophisticated test equipment available in the world. As a result, we have one of the lowest product failure rates in the industry, and we confidently back it up with a generous [Warranty program](#).
